

Wine-Mate 8500SSWC Split Ceiling- Slim Wine Cooling System

Wine-Mate ceiling-slim cooling systems WM-4500~12000SSWC are designed and used to provide a cold temperature between 50~65 °F for a properly insulated wine cellar. The wine cellar will maintain humidity range within 50~75% RH. These temperature and humidity ranges like in natural caves are optimized for long term storage of wine. SSSWC units consist of a condensing unit and an evaporator unit; they are connected by a liquid line and an insulated suction line. SSSWC condensing units can be located away from the wine cellars 75 ft so that noise and compressor vibration are isolated. SSSWC evaporator units can be installed on the ceiling near walls of a wine cellar.

Key Features

- Stable temperature between 50~65 °F for a properly insulated room in a normal environment
- Maintain humidity of 50~75% RH even when the environment becomes dry or humid
- The condensing units can be placed up to 75 ft away from the wine room, which will allow for extremely quiet operation
- These units require professional installation by a licensed refrigeration technician
- Perfect for storing cigars, chocolate, salami, and fine leather and furs (additional cost and customization required)

Specifications

Cellar Size:	2000 cu ft
Btu/h, CFM:	8500 Btu/h, 602 CFM
Decibel Rating:	61 dBA
Dimensions:	Evaporator: 45-3/4"W x 13-1/8"D x 12-1/2"H Condenser: 24"W x 18"D x 18"H
Electrical:	Evaporator: 115V/60Hz/1.5A Condenser: 115V/60Hz/15A
Weight:	Evaporator: 60 lbs Condenser: 115 lbs
Refrigerant:	R134a
Thermostat:	Advanced Digital Control Display
