Assembly instructions for 6ft IBH Module.

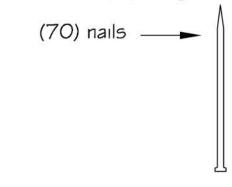

Fasteners.

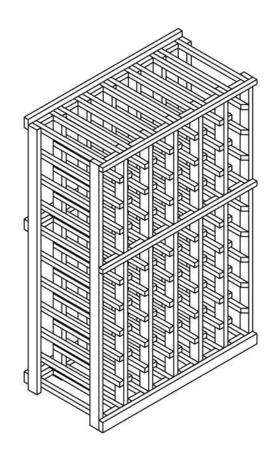

IBHalf-6. I

Tools needed:

- (1) Hammer
- (1) Power drill
- (1) Level
- *Suggested 18 guage Brad Gun with 11/4" brad nails will make install easier.

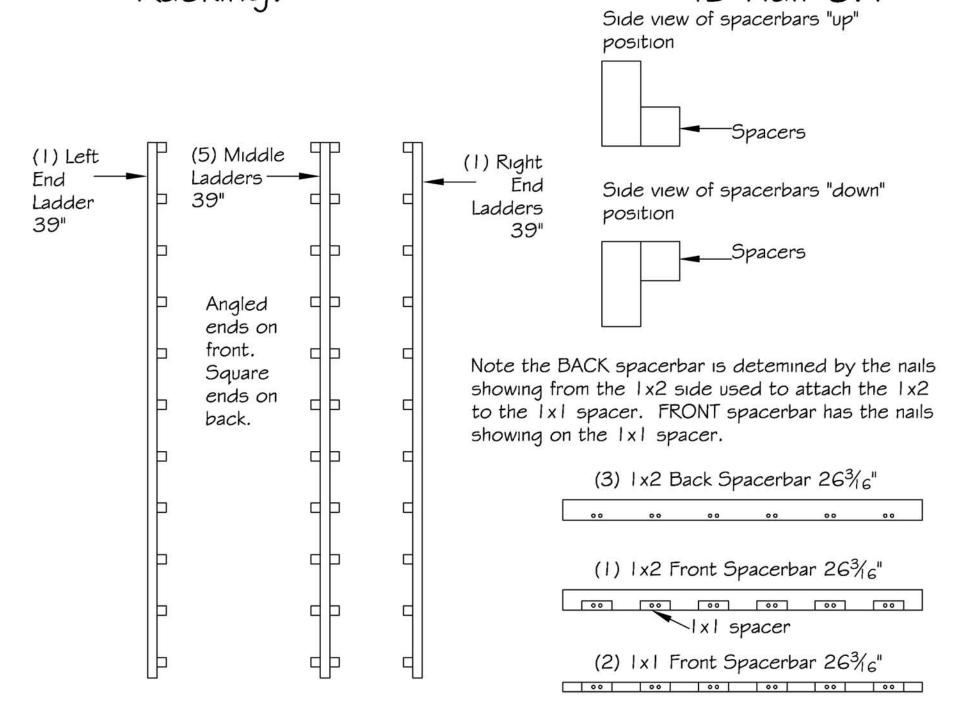

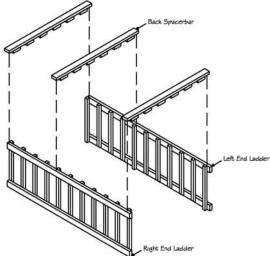

to other modules.

Assembly instructions for 6ft IBH Module. Racking. IB Half 6.1

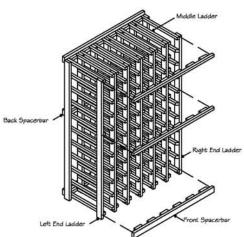

step 1

Step 1: (Attaching back spacerbars)
Place the right and left end ladders on the floor, making sure the angled rails are facing the floor. On the 1st, 7th, and 11th rungs, nail the end ladders to a 1x2 BACK spacerbar. The spacerbars need to be "up" so that the small block of wood is towards the bottom.

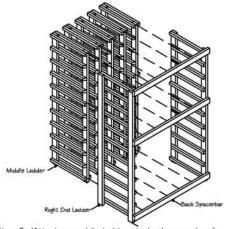

step 3

Step 3: (Attaching Ix2 * Ix1 front spacerbars)

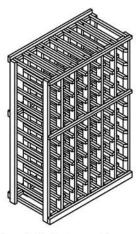

Starting from the bottom, place a Ix2 spacerbar on the 1st rung and a Ix1 spacerbar at the 7th and 11th rung. Place one nail into each ladder to secure into place. The bottom spacerbar needs to be down so that the spacer peg is off of the floor.

step 2

Step 2: (Attaching middle ladders to back spacerbars)
Stand up the rack. Insert the five middle ladders into the slots of the spacer bar as shown. Nail each middle ladder onto the spacer bars as shown with the nails provided.

step 4

Step 4: (Finish)

Fasten to the wall through the back spacerbars using the 2½" screws and using a level to make sure the rack is mounted square on the wall.
