This wine cooler should be serviced by a qualified technician.  
Be sure to have the unit *unplugged* while repairing the unit.

**Note:** The backlit panel size may vary with different models.

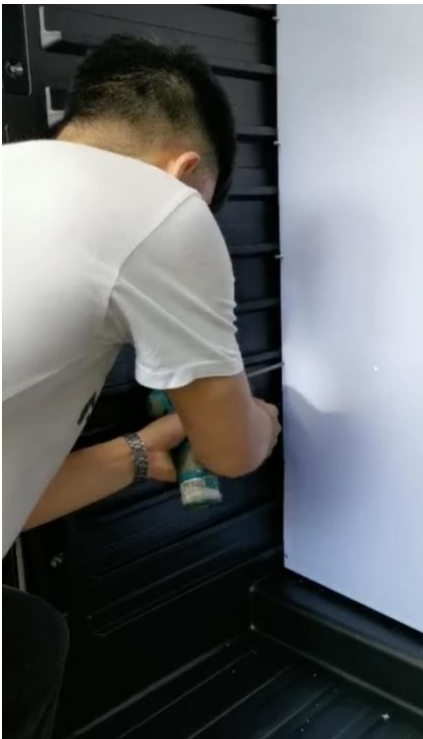

1. With a screw driver or drill, loosen up the screws on each side of the backlit panel.

2. Once the screws are loosened, safely remove the backlit panel from the back.

3. Repair the backlit panel and lights. Re-insert the panel to the back of the unit to finish off the repair process.

4. Tighten up the screws on each side of the backlit panel.
