

PLUSH DAMPING SUSPENSION FLUID

DESCRIPTION:

An advanced damper fluid for high performance bike suspension systems. PLUSH fluid is designed for use in both forks and shocks. Surface active technology eliminates stiction, reduces friction and considerably lowers the force needed for easy breakaway in the initial stroke of travel, providing smooth action throughout the entire range of travel. Advanced additives extend seal life and protect the system from wear and corrosion. Ultra-clean detergents offer smooth, trouble-free operation. "Zero Fade" high viscosity index (VI) fluid ensures consistent damping action over a wider operating temperature range than conventional suspension fluids.

PLUSH is optimized for today's sophisticated suspension systems. There is no better choice for your bike. Meets or exceeds all known OEM specifications for suspension fluid and will not void fork or shock warranties.

FEATURES & BENEFITS:

- Formulated specifically for mountain bike suspensions
- Specially designed for use in both mountain bike shocks and forks
- Reduces stiction and running friction
- Consistent damping performance at any temperature
- Proprietary additive system minimizes oxidation, corrosion and wear
- Designed to protect seals and extend time between rebuilds

APPLICATIONS:

For all mountain bike suspension systems and applications, including All Mountain, Cross Country, Downhill, Enduro and Freeride.

TECHNICAL DATA

SPECIFICATION	TEST METHOD	3WT	5WT	7WT	10WT
APPEARANCE	VISUAL	Amber	Amber	Amber	Amber
VISCOSITY @ 40°C (cSt)	D445	14.0	18.6	30.4	46.0
VISCOSITY @ 100°C (cSt)	D445	4.2	5.0	7.3	10.2
