CASE STUDY FINDINGS:

OsteOrganiCAL has shown a maximum 34% bone density increase after 10 months!

SUSAN E. BROWN, PHD, CCN

Read more about the study below!

“In April I had a bone scan and was diagnosed with severe osteoporosis. In May I found out about a product called OsteOrganiCAL Plus®, I took OsteOrganiCAL Plus® for three months, went and had another bone scan. My overall bone density increased by 3.9%. I have never felt better.”

- Joan M. Wilton Manors, Florida

“I have been using OsteOrganiCAL Plus® for a year with good results. The technician, after the second scan, told me that I had improved by 7% which she felt was impressive. I have learned a valuable lesson to pass along to others.”

- Margaret C. Vista, California

Natural Option USA

OsteOrganiCAL as a High-Absorption Calcium Source

SUSAN E. BROWN, PHD, CCN

Medical Anthropologist & Certified Clinical Nutritionist

STAGES OF OSTEOPOROSIS

NORMAL BONE

OSTEOPOROSIS

SEVERE OSTEOPOROSIS

CASE # 1 – Doris Falk, Little Falls, MN Age 72 DX: Osteoporosis of Hip and Spine

Doris has had five sequential bone density measurements. These measurements documented that she was consistently losing bone. She began using our High-Absorption calcium source in the recommended dose. Doris gained bone mineral density at all sites tested after 14 months of using the product (+1.7% in the total Hip; +2.6 % in the femoral neck and + 1.8 % in the spine).

CASE # 2 – Rose Teeters, La Ponte, IN, Age 87 DX: Osteoporosis Hip and Spine

Rose, after 12 months on the regimen increased bone mineral density in both the spine and hip (+ 7.8 % spine and + 2.3 % hip). Scoliosis may influence spinal reading.

“I find that if I stop taking OsteOrganiCAL Plus, I get the pain back. If I continue taking it, I am fine.”

- Emma H. Hollywood, Florida

Read more cases and testimonials below!

"I am pleased with the results as far as pain is concerned. I used to have a spot on the side of my foot, which hurt quite a lot when walking, and that pain is pretty well gone, also, the surgery area feels just fine now too. Plus, I feel better after being on this product. My doctor would have preferred that I take Fosamax, but after much deliberation, was convinced I should try OsteOrganiCAL Plus for which I am grateful to you and my Lord."

- Arleen B. Watseki, Illinois

"This is my second order and I feel so much better after two months of taking OsteOrganiCAL Plus ®."

- Rogene L. Fort Worth, Texas

"My first bone density test indicated I was at risk for traumatic fracture. After I began the OsteOrganiCAL Plus® program, my follow-up test showed considerable improvement."

- Doris W. Raleigh, North Carolina

"I first started on it nearly two months ago and my back feels so much more relaxed. Thank you for the first improvement I have seen in 23 years."

- Mary P. Arvada, Colorado

"I am so delighted with your OsteOrganiCAL Plus® program. I have been on this product for 5 months. I have osteoporosis and rheumatoid arthritis. I am 67 years old. When I first started taking your product, my lower back was very weak, also my legs, especially the knees, were very weak. I can see a lot of difference now, after 5 months. Last month I had a hard fall, my hip was black and purple. My chiropractor said she had never seen any bruise that bad, without a broken hip. I am sure it is this product that saved me from a break. Thank you so much for stronger bones."

- Nancy L. Punta Gorda, Florida

HALTING BONE LOSS

CASE# 3 – Paulina Thoma, IL, Age 92, DX: Osteoporosis

(Subject requested that city not be listed)
*studies conducted on the main calcium ingredient in OsteOrganiCAL Plus

Paulina had a CT scan providing a diagnosis of spinal osteoporosis (only the spine was measured).

She began taking the recommended dose of our high-absorption calcium source. Paulina took another bone-building agent. The bone density improvement between her tests 6 months apart while on our regimen moved her from having severe osteoporosis with a -3.5 standard score to just barely having the osteoporosis diagnosis of - 2.5 standard deviation six months later.

CASE # 4 – Elizabeth Wildings, Ramsey, NJ, Age 87, DX: Osteoporosis of Hip and Osteopenia of Spine

Elizabeth began using our product WHILE USING NO OTHER MEDICATION THAT WOULD IMPACT THE BONE. The follow-up bone density test done 18 months later showed an increase of total hip bone mineral of + 2.5%; a spinal increase of = 18.9% and a wrist decrease of -5.3%. She took the recommended dose.

OSTEORGANICAL CASE STUDY

Susan E. Brown, PHD., CCN

Medical Anthropologist
Certified Clinical Nutritionist
Director of The Osteoporosis Education Project

"It's been about seven months my wife has been on OsteOrganiCAL Plus ® During this time she has not fractured any bones. She has gained weight from 90 to 97 lbs."

- Russel R. Bloomington,, Minnesota

“This year from January through March I was again in bed. I ordered OsteOrganiCAL Plus® in March. Within two weeks I was better and in two more weeks, I was even better and in two more weeks the sciatic pain left. I have been on it for 8 months now and haven’t been in bed for 7 months.”

- **Ruby D. Banks, Oregon**

“I can tell you that I can hardly believe that my left knee is beginning to tell me that it is recovering, no hurts or pain. It is recovering so well that I hardly know that I have a knee. This is absolutely wonderful product.

I am so glad that I opted for OsteOrganiCAL Plus® instead of Fosamax. I am not near a bone scanner at this time, but I certainly don’t feel like a cripple.”

- **M.S., Kansas**

“Please find enclosed the results of 2 DEXA bone density tests, the first indicating severe osteoporosis. Although Fosamax has been strongly recommended, I have put off taking it in favor of trying OsteOrganiCAL Plus® and weight bearing exercises. My second bone density test having taken OsteOrganiCAL Plus® for almost 6 months by that time. Test results indicated a 3.5% increase in lumbar spine density. Needless to say, I am very pleased with the increase.”

- **Martha B. Phoenix, Arizona**

“... after taking my first 6 months of OsteOrganiCAL Plus®, and seeing the results of the bone density test, I showed them to my endocrinologist. He was delighted and said, “Never before have I seen such an improvement in an 80-year-old woman

- **Audrey C. Timonium, Maryland**

CASE # 5 – Lois Ghan, Ione, CA, Age 71, DX: Osteoporosis of wrist (distal radius)

Lois was diagnosed with osteoporosis by a single measurement of the distal radius (wrist). She was on no other bone medications when began taking the recommended dose. In 11 months while on the product SHE GAINED 4.5 % in the distal radius.

CASE # 6 – Janice Green, Houston, TX, Age 54, DX: Osteopenia of Spine

Janice was diagnosed with osteopenia of the spine and found to have a hip bone density lower than that of the average young person (but not yet in the osteopenia range). She began our regime because her mother had severe osteoporosis and Janice feared losing bone. Janice took the recommended dose. She was on no other medications that would impact bone. Although only having mild osteopenia, Janice had a spinal increase of 4.8% and a 0.1% increase in the total hip during the time she was on our product.

CASE # 7 – Marlene Buras, Kenner, LA, Age 67, DX: Osteoporosis of the hip; normal spine density

Marlene was diagnosed with Osteoporosis in the hip. Her base line bone density test showed on-going bone loss of both the spine and hip. She began using the recommended dose. After 6 months she gained 3.7% in the spine and 0.6% in the hip

“I am very pleased with this product and will continue taking it. My doctor is amazed. I recently received a copy of my bone density report. I have discontinued Fosamax for a year. The report still showed improvement.”

- **Carla S. St. Louis, Missouri**

“I have dutifully taken the product since it arrived some weeks back. The soreness of my lower back has diminished considerably despite me getting even less lower back exercise than I was before.”

- **Susan K. Sun Valley, California**

Call + 1 (800) 516 9796 to place an order!

CASE # 8 – Ruth Wright, Greeley, CO, Age 82, DX: Osteoporosis of Hip, Osteopenia of Spine

Ruth's baseline study test was while she had already been on anti-resorptive drug therapy for some four years. Ruth began using the recommended dose while CONTINUING ON ANTI-RESORPTIVE DRUG THERAPY. Her subsequent bone density two years apart showed increases that in my analysis are clearly due to the addition of our high-absorption calcium source, I SUGGEST THIS BECAUSE Ruth had been on anti-resorptive drug therapy for over four years when she began the regimen.

At that point bone building impact of anti-resorptive drug therapy should have reached a plateau and subsequent large changes in bone mineral would not be expected. The increases in bone minerals seen when this calcium source - was added to the long-established anti-resorptive drug therapy program were +5.9% in the spine and + 11.6% in the hip. She had been on the regimen for 22 months at the time of this follow-up bone mineral test.

OsteOrganiCAL® Plus

DESCRIPTION:
120 EASY-TO-SWALLOW CAPSULES PER BOTTLE

SUGGESTED USE:
4 CAPS DAILY (2 CAPS TWICE A DAY WITH MEALS)

QUANTITY
30 DAY SUPPLY

DAIRY FREE

SOY FREE

GMO FREE

GLUTEN FREE

“... better than Fosamax.”
 “My clinical results in reversing osteoporosis have been better with OsteOrganiCAL Plus® than they have been with Fosamax.”

REVERSING OSTEOPOROSIS NATURALLY CASE # 9 – Marion Williams, Piles Grove, NJ, Age 68, DX: Osteopenia of the Spine

Marion's baseline bone mineral measurement had a diagnosis of osteopenia of the spine. SHE BEGAN TAKING our high-absorption calcium on the recommended dose. After 6 months she showed a spinal increase of 3.2% and a hip increase of 1.3%. Interestingly enough, before using this product she experienced a 3.57% loss in spinal bone within 11 months.

Marion's case might be confounded, however, because during 6 months of her time using the product she also used an amount of Soy Isoflavones. As best she recalls, during 6 months of USE SHE ALSO USED SOME 80 MGS OF Soy Isoflavones from four to five times a week. From my research on Soy Isoflavones, I do not believe this dose of Soy Isoflavones had a significant bone-building effect. This possibility, however, cannot be ruled out. Soy Isoflavones research suggests that regular daily use of 100 mg of Soy Isoflavones is needed to obtain a much less increase in bone density.

CASE # 10 – Irene Mields, Alexandria, VA, Age 77, DX: Osteopenia of Hip and Spine

Irene was using anti-resorptive drug therapy ten months before she started to use our high absorption calcium supplement, taking it along with the anti-resorptive drug therapy she had already been on for ten months (being on the product FOR NEARLY 15 MONTHS AND ON drug therapy some 26 months) She was documented to gain 7.5% spinal bone mineral and 18.4% hip density. As the radiologist technician commented to her, these gains are very unusual and not commonly (if ever) seen with the use of anti-resorptive drug therapy alone. These exceptional gains in bone mineral obtained by combining the drug anti-resorptive drug therapy with our product suggests a new possibility of combined therapies.

From \$245
to \$174
for 6 bottles!

BONE DENSITY RESULTS

"I have reviewed dozens of 'Before and After' x-rays and bone density reports which show this natural wonder halts and rebuilds a significant amount of bone."
