WP6WC-PKT

WIRELESS PACIFIC™

WP6WC-PKT Series 6 Way Chargers

Wireless Pacific is a world leading specialist two way radio accessory manufacturer. For over 20 years we have provided innovative and cost effective charger solutions to police and emergency services, industrial complexes, construction sites, manufacturing and to commercial retail outlets.

To complement the move to smaller, compact, wearable radio devices our latest WP6WC-PKT charger footprint (300x80x30mm) requires minimal desk space and is perfectly at home sitting elegantly on a modern office desk or tucked out of the way on a busy work or dispatch area. Designed specifically for Kenwood PKT-23 ProTalk LT UHF FM Two-Way radios, WP6WC-PKT series chargers are intelligently packaged in a sleek design in order to take up as little space on a desk as possible, whilst built tough enough to withstand the daily rotation and charging of radios in a busy commercial or government communication operation.

We continue to develop and introduce an evolving intelligent range of select 6 way multi-chargers designed for the industry's most popular two way radios. You can rapidly charge your fleet of radios in a matter of hours, the WP6WC chargers can be powered from its supplied universal 110-240V AC 50/60Hz power supply or equally can be powered by an available 10-15V DC power source* as found in most vehicles (13.8V) when AC power is not an option. * requires use of a 5.5/2.5 DC power plug

**Universal AC/DC
Power Supply**
