# Wobbly Snowman

## Instructions:

Once finished, poke the side of Santa and watch him wobble.

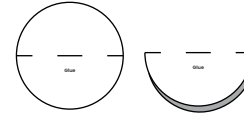

- 1** Decorate the snowman and then cut out their head, tummy, and base.

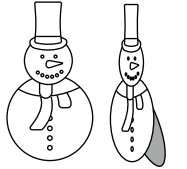

- 3** Stick the snowman's head and tummy together.

- 2** Fold on the dotted lines.

- 4** Stick one half of the base to the back of the snowman's tummy. For extra sturdiness use cardboard to back it.

# Origami Star

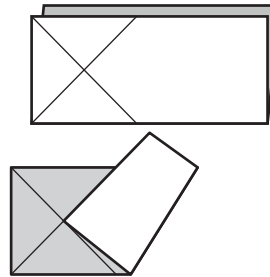

1. Fold a square piece of paper in half

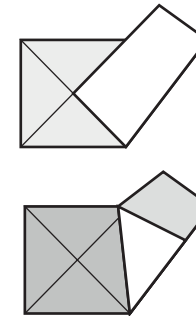

2. Fold up the bottom left corner up to the edge to create a triangle

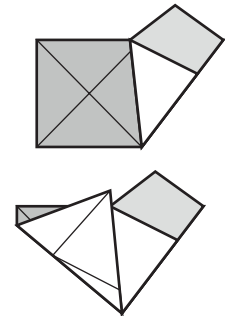

3. Open it up again and do the same to the top left corner and fold it in

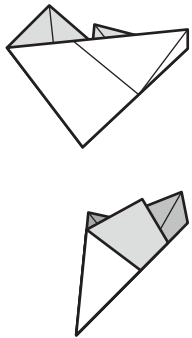

4. Open it up again and bring the bottom right hand corner into the middle where you have made a cross

5. Fold that corner that met in the middle back over to the edge to create a kite shape

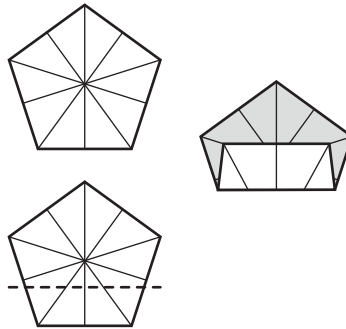

6. Fold over the bottom left corner up to the new kite's edge

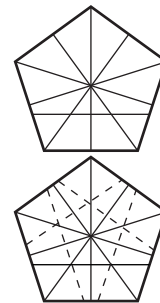

7. Flip the paper over and fold the kite over

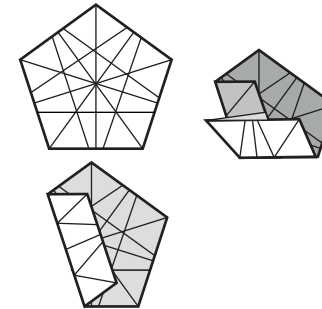

8. Cut at the dotted line so you are left with a triangle

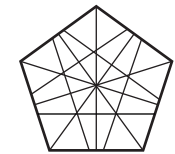

9. Unfold the triangle to get a pentagon and fold the bottom up on the dotted line

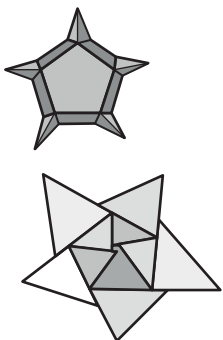

10. Open the pentagon back up and repeat step 9 on all of the edges

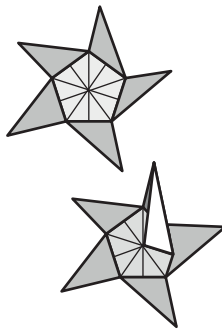

11. Open up the pentagon and fold the left side over again. Then re-fold the bottom but pull the first fold's bottom corner outwards

12. Unfold and repeat step 11 on every side

13. Pinch each corner and each corner should naturally fold to the left, fold them all flat in that direction to create a star

14. Flip over the star and take one corner of the pentagon and bring it to the middle

15. Go around the star and repeat step 14 on each corner of the pentagon. Fold the last corner underneath your first fold
