## **SECTION 3 – HAZARDS IDENTIFICATION**

---

### **3.1 EMERGENCY OVERVIEW**

Vapor is irritating to eyes, skin and mucous membranes and respiratory tract.

### **3.2 POTENTIAL HEALTH EFFECTS**

May caused sensitization by inhalation, Narcotic effects, headache, dizziness, vomiting.

Skin : Dryness

Eye : Irritation

### **3.3 POTENTIAL ENVIROMENTAL EFFECTS:**

Not available.

### **3.4 SIGN AND SYMPTOMS OF EXPOSURE:**

Vapor is irritating to eyes and mucous membranes above TLV. Prolonged and repeated over exposure to vapors may cause symptoms of non-allergic asthma in sensitive individuals.

### **3.5 EXISTING CONDITIONS AGGRAVATED BY EXPOSURE:**

None Known

---

## **SECTION 4 – FIRST AID MEASURES**

---

**4.1 Inhalation:** Move to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If symptoms develop and persist, get medical attention.

**4.2 Skin contact:** Do not pull bonded skin apart. Soak in warm soapy water. Gently peel apart using a blunt instrument. If skin is burned due to the rapid generation of heat by a large drop, seek medical attention. If lips are bonded, apply warm water to the lips and encourage wetting and pressure from saliva in mouth. Peel or roll lips apart. Do not pull lips apart with direct opposing force.

**4.3 Eye contact:** Immediately flush with plenty of water for at least 15 minutes. Get medical attention. If eyelids are bonded closed, release eyelashes with warm water by covering with a wet pad. Do not force eye open. Cyanoacrylate will bond to eye protein and will cause a lachrymatory effect which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Medical attention should be sought in case solid particles of polymerized cyanoacrylate trapped behind the eyelid caused abrasive damage.

**4.4 Ingestion:** Ensure breathing passages are not obstructed. The product will polymerize rapidly and bond to the mouth making it almost impossible to swallow. Saliva will separate any solidified product in several hours. Prevent the patient from swallowing any separated mass.

Notes to physician: Surgery is not necessary to separate accidentally bonded tissues. Experience has shown that bonded tissues are best treated by passive, non-surgical first aid. If rapid curing has caused thermal burns they should be treated symptomatically after adhesive is removed.

---

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

---

6.1 Personal precautionary measures: Refer to section 8 –personal protection. For large spills, evacuate the area and ensure good ventilation if possible - wear self-contained breathing apparatus if necessary. Wear suitable protective clothing.

6.2 Environmental protection measures: Polymerize slowly before disposal – see section 13.

6.3 Procedure for cleaning / absorption: For large spills wear self-contained breathing apparatus. Do not use cloths for mopping up. Polymerise slowly with water and scrape up.

---

## SECTION 7 – HANDLING AND STORAGE

---

### 7.1 HANDLING:

Wear proper protective equipment, and avoid contact with skin or eyes.  
Use only in well ventilated areas.  
Use exhaust ventilation to keep air concentration below exposure limit.  
Keep container tightly closed when not in use. .

### 7.2 STORAGE:

Practice good personal hygiene after using this material, especially before eating, drinking, smoking or using the rest room.  
Keep out of reach of children.

---

## SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

---

8.1 Engineering controls: Use positive down-draft exhaust ventilation if general ventilation is insufficient to maintain vapor concentration below established exposure limits.
