MAKEUP

Easy  
Step-by-Step  
Instructions

## LEOPARD

**Step 1** – Start with clean, moisturized skin. Apply the White Cream Color to the highlights of the face and down the center of the neck. Blend with sponge applicator.

**Step 2** – Use the Brown, Orange, and Yellow Cream Colors on the contours of the face and down the sides of the neck. Blend the shades together using the sponge applicator. Use the Brown Cream Color to darken

around the eyes and to sculpt the sides of the nose. Once desired look is achieved, use the powder puff to press Colorset Setting Powder on top of the Cream Makeup to set it in place.

**Step 3** – Using the Black Pro Pencil create a winged liner, add a diagonal line from the nose to the wing. Outline the tip of the

nose, and line the upper lip. Connect the nose and upper lip using the Black Pro Pencil, then fill in the nose and upper lip using the Black Cream Color. Fill in the area beneath the eye and above the diagonal line with the White Cream Color.

**Step 4** – Use the Black Pro Pencil to create small leopard spots on the face and down the neck. Fill in the spots with the Yellow and Orange Cream Colors. To complete, clip on the included whiskers (trim length as desired).

## TIGER

**Step 1** – Begin with clean, moisturized skin. Use Orange Cream makeup to contour around the jawline, hairline and down the sides of the nose. Use Yellow to blend into Orange to add more color and depth. Dab white all over the lids and up onto the brows, blending up onto the forehead.

**Step 2** – Using the Black Liner Pencil line the eyes top and bottom to create a long wing extending from the outer corners. Next, use the Black Cream makeup to create fine, hair like strokes around the face to create tiger stripes. Mimmick fur by using very little pressure to lay down the color.

**Step 3** – Trace along the nostrils and fill in to create the tiger nose using Black Cream makeup. Using the same brush, draw a thin fine line from the nose down to the upper lip. Draw a small triangle at the cupid's bow using Black Cream makeup and fill in the top lip. Add a curl to the outer corners of the lips to create the snout of the tiger.

**Step 4** – Create highlights using White Cream makeup on the inside of the black stripes. This will add some dimension to the black stripes. Don't forget to drag some Orange and Yellow Cream Color down the neck. Using the Powder Puff, press Colorset Powder on top of the Cream Makeup to set it into place. Now clip on your whiskers!
