

WITCH

Makeup Kit

Step 4 – Paint the Black cream makeup on top of your smile lines and curve into the folds of your nose. Then apply the Black cream makeup to the lips and drag the paint upwards to create wrinkles around the mouth. The Black shade can also be painted on the tip of the nose and around the nostrils to create the illusion of a pointed nose.

Step 5 – Use the Yellow cream makeup to add highlights and emphasize wrinkles. Place the Yellow shade between the wrinkles on the forehead, bridge of nose, and chin. Then blend the Yellow into the Green using the sponge applicator. Once makeup is blended the way you like it, set the entire face with Colorset Powder and Powder Puff.

Step 6 – The final step is to create decayed teeth using ToothFX. Dry off your teeth using a paper towel, then paint the ToothFX directly onto teeth. Let the tooth paint dry for 30 seconds before closing mouth.

Makeup Artist:
Rachel Duffy

**Now you're ready to
go out and scare!**

REMOVAL – Remove cream makeup by first using soap and water. Use warm water and soap to gently remove the wart and Adhesive Tape from skin. To remove Tooth FX, brush teeth with a toothbrush and toothpaste.

**Includes good
and evil looks!**

**Easy
Step-by-Step
Instructions**

Good Witch

Step 1 – Start with a clean, bare face. Apply the Green shade in the tri-color cream makeup palette on all visible skin using the non-latex foam sponge.

Optional Wart: See Step 1 of **Evil Witch** to add wart to look.

Step 2 – Using the Yellow shade in the tri-color palette, add highlights on top of the green base. Apply to the forehead, cheekbones, chin, and bridge of the nose, blend using the sponge applicator. Set the makeup using Colorset Powder with the Powder Puff.

Step 3 – Use the Black Pencil to define the brows, creating a high arch shape. Apply same pencil to upper & lower eyelines, buffing out to a wing. Finish the look by adding the Black shade from the tri-color palette to the lips.

Evil Witch

Step 1 – Start with clean, dry face. Apply prosthetic wart using the Adhesive Tape Dot. Peel the paper off both sides of the Adhesive Tape and apply the dot where you want the wart. Trim the lace on the wart, then press the prosthetic wart on top of the Adhesive Tape Dot. Apply the Green shade in the tri-color palette to all exposed skin.

Step 2 – Use the Black shade in the tri-color palette around the eyes and buff out to create a smokey eye effect. Use the same Black cream color to define arched brows. Create wrinkles on the forehead and bridge of nose using the Black cream makeup. Buff out the top edges of the wrinkles using the sponge applicator.

Step 3 – Add contour by applying the Black cream makeup under the cheekbones and blending downward into the Green Base. Use the included brush applicator and Black cream makeup to create lines under the eyes, creating the look of deep-set eyes and wrinkles. Buff out the edges of the Black lines and blend into the Green. Use the same color and technique to create wrinkles on the sides of the eyes.
