General recommendations

The Grill leaves the factory with pre-cured paint. It is possible that when the Grill is started up for the first time it gives off a smell of burnt paint, this is because the paint is cured in use, this event is normal and will not be repeated on subsequent starts.

During this final curing process, the surface of the curing should not be touched as this could damage the paint.

Do not burn plastics derived from petroleum.

Do not get wet, in contact with moisture, the equipment will oxidize.

Choose a dry place to store it, protecting it from the elements and climatic factors (rain, dust, etc.)
