# **Tromen is not only synonymous of heating, Is of Fires.**

*Since 1978 we are an expanding Argentine company.*

*We generate exclusive products with innovation, quality and design.*

*These qualities place us as market leaders.*

*Over the years, we have expanded our line of heating products towards our Gourmet and Outdoor lines, being pioneers in the development of domestic Wood-Fired Grills and Ovens.*

*For years, the classic salamanders, fireplaces or wood stoves accompanied our environments as the main heating system.*

*Over time, all products tend to improve their technologies to offer better features and optimize resources.*

*It is a moment in which firewood became a scarce commodity and the rational use of energy is an issue that was installed worldwide, it is essential to stop wasting it, burning it in these classic systems of incomplete combustion.*

*That is why our double combustion system, where the wood is burned twice, directly improves this deficiency.*
