

# Dip Powder

*Follow the step-By-Step Guide*

## APPLY

8

Apply activator over your entire nail to seal the powder. Wait for the nails to set, use the “tap test”; if you tap a file on the nail and it makes a sound the dip powder is dry and ready to file.

9

File and buff the nails.

10

Apply the activator once more and let air dry. (Roughly two minutes)

## FINISH

11

Take a lint free wipe with two pumps of acetone and wipe the entire nail. This will remove any dust.

12

Apply finish gel and let air dry for 2 minutes

13

As an extra step, you can finish off the look with our No-Wipe top coat for a glossy shine and cure under our UV/LED lamp for 30 seconds.
