

## Manual Load Stacker

A 304L Stainless Steel Manual Load Stacker is a great way to transport products in sanitary settings. The compact 304L stainless steel design not only helps transport heavy loads around the work area, but also fits in a compact area for space saving when not in use. The unit is raised manually for a more precise height positioning, which diminishes bending and twisting when loading/unloading materials. Due to the cradle design, goods can be placed on the stacker from three sides without the need to change the placement of the stacker. Cradle adjusts in 1" increments up to 16" wide. Rolling casters are attached to provide a smooth transfer of products, while the braking system maintains safety once the unit is in place.

MODEL NUMBER	CRADLE SIZE (W x L)	MAXIMUM ROLL DIAMETER	SERVICE RANGE	UNIFORM CAPACITY	WEIGHT (POUND)
ULM-WMS-550	16" x 16"	24"	5 <sup>1</sup> / <sub>8</sub> " to 62"	440 lb.	195

## Electric Powered Stacker 12V DC STANDARD

An Electric Powered Stacker is an outstanding advantage in the workplace cleanliness. The design promotes accessibility to all surface area for simple washing and drying after or before transferring hygiene safe products. The upright high handle allows the user to maintain the proper posture throughout the moving of the unit, both loaded and unloaded. Front and back caster lets the stacker maneuver throughout the workplace with ease. Once in position the forks are raised and lowered by a 12V DC operation which minimizes productivity by reducing transfer time.
