Lift Truck Safety Light

A safety warning spot light is a wonderful asset in shipping and manufacturing facilities with intersecting walkways. The light is utilized to provide a warning to people that a vehicle is approaching the surrounding area. The unit is easily mountable to the front or back of a forklift or other moving equipment. The closer to the ground the light is mounted the less distance it will travel, therefore adjusting the model to best fit the user's needs is crucial. A centrally located pivot point can be maneuvered for precise light positioning.

Fork Leveler

Designed to aid the fork lift driver in determining when the forks are level. Unit reduces the risk of damaging or piercing product when removing it from pallet racking. Fasten the steel leveler to the mast of the fork lift. While tilting the forks to the desired angle, the fork leveler will tilt as well, showing that the forks are not currently in a horizontal position. When forks are moved back into a safe level angle, the leveler will be perfectly horizontally.
