

Portable Infrared Heat Panels

Portable Infrared Heat Panels are a great asset in cold work areas. Built to withstand industrial applications, such as auto collision repair shops. Units can be rolled easily to an array of areas without the need of additional personnel or lifting devices. The overall height allows the heat to expand more freely through out the workspace and quickly diminishes cold areas.

Manual Brush Sweepers

Use these sweepers anywhere, indoors or out, on concrete, asphalt, tile, and commercial carpets. Great for parking lots, gas stations, theaters, warehouses, schools, etc.

Model JAN-II is faster and more efficient than cleaning with conventional push brooms. The rotation of the wheels causes the brushes to rotate and pick up material. The side broom allows for cleaning along curbs, walls, and in corners. Contains no electric motor. Removable handle for storage is standard. Steel construction.

Model JAN-SM includes two (2) brushes on each front corner with a 1/4" overlap. A retractable handle is ideal for storage.

Model JAN-LG is a deluxe brush sweeper. The two (2) 11" diameter brushes, one on each front corner, come with independent 1/2" height adjustment. The bottom center brushes also features 1/2" height adjustment. Those brushes measure 17 1/2" x 5 1/2". A folding handle for easy storage is standard.

Magnetic Push Sweepers

Magnetic Sweepers are ideal for manufacturing facilities and construction sites. The sweeper is ergonomically friendly with an efficient handle controlled release. The design and capacity can accommodate large and small materials. While the standard handle allows for comfortable upright position during use, the wheels allow smooth rolling for quick and easy collection of objects.

Model MPSR-24-B and MPSR-36-B have a bent handle for more ergonomic handling.

Model TAM-30 is constructed of aluminum frame for lightweight strength. Other features include a telescoping handle for easy storage and length preference, a manual release for safe disposal, and a rotatable base for maneuverability.
