

# CALCULATE YOUR STARTING PAGE

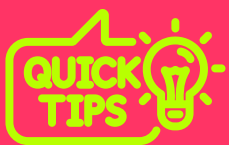

Last even page number of your book:

Last page number indicated in the pattern:

Your starting page:

The starting page has to be an odd number, if this calculation produces an even number, simply add 1 to the number to determine your starting page.

Always make sure to use a book that has enough pages in it. More pages than needed often results in a better looking folded book. You'll get the best result with a book that has about 75 - 100 pages more than you need for the pattern. More than that is also not a problem, less is also not a problem.

FOLDED BOOK ART
