

SHURFLO-CHECK-T
City Water Adaptor for Shurflo
Faucet in Vanagon Camper

Note: When city water is connected you CANNOT use tank water. You will hear the tank pump running, but the pressure from the city water will hold the check valve closed, this does not harm the pump.

- Cut the clear water line from the on-board tank, beneath the sink and install the fitting in-line (the arrow printed on the side of the fitting points TOWARD the faucet).
- The gray, city water line then threads onto the brass fitting. Test for leaks at all connections.
- The fitting can be left hanging free or fastened to the wall with a clamp, as in the photo. Be sure to position the fitting so it does not interfere with the operation of the drawer or other accessories.
