TECHNICAL DATA SHEET

ANTI-SKIN SPRAY

ANTI-TEARING AND ANTI-DRYING AGENT FOR INKS

CHARACTERISTICS: Anti-drier consisting of ecological propellant completed with antioxidant substances which develop an efficacious anti-catalytic action on the driers contained in the printing inks.
It avoids inks surface oxidation.

APPLICATION: Product is applied vaporizing inked areas where skin formations may occur owing to prolonged machine standstills or stops, allowing considerable saving in machine cleanings, which would have been otherwise necessary, thus enabling a better exploitation of the printing press.

PRE-CAUTION: Handle with care and follow the safety instructions indicated on the label

PACKING: 400ml spray flacon
