TECHNICAL DATA SHEET

OFFSET DELETION PEN

**CORRECTION PENS FOR PRESENSITIZED PLATES,
SUITABLE FOR ANALOGUE/CONVENTIONAL AND CTP THERMAL PLATES**

CHARACTERISTICS: It eliminates non-required printing areas from the surface of analogue positive and CTP thermal plates, after exposing and developing. Liquid contained in the pen deeply penetrates up to the grain porousness, being at the same time a solvent for the emulsion and making the aluminium hydrophilic.

APPLICATION: Wipe many times the pen tip on the not required printing area up to its complete dissolving, then wait for 30 - 60 seconds and wash with plenty of water.

PRE-CAUTION: Liquid contained in the pens is corrosive, therefore use most common individual protective measures, keeping to the instructions for use indicated in the Safety Data Sheet.

Available in 3 different tips : ultra-fine, fine and medium.
