MERCURY **User manual**

Thank you for your purchase.

Please read the instructions carefully to know more about the watch.

Thank you for choosing our YOUNGGEAR smartwatch.

Thank you very much for purchasing and using our company's smart watch products.

You can have a comprehensive understanding of the watch's functions and easy operation methods by reading this manual. Our company reserves the right to make modifications to the content of this manual without prior notice. Some features that differ in the corresponding software versions are considered normal.

Key: Long press to turn on/off, click to wake up the screen when the screen is off, click on the dial interface to enter menu mode, and double-click on the menu interface to switch menu style.

Dial switching: Rotate the encoder to switch the dial.

Install the "Wearin" app

Before using this device, please download and install the "WearinAPP" on your phone. You can scan the QR code of the "Download App" on your device using the "Scan" function on WeChat or browser, and select the corresponding operating system on your phone to download and install it; You can also download and install by searching for 'Wearin' in app stores such as "App Store", "Google", and "AppStore".

Connecting a watch

Scan Code Connection: After downloading the app, enter the app, click on the top right corner, select the "Scan" function, press the button on the watch to enter the dial interface, slide to the right on the left side of the dial, click the "Connect Phone" shortcut button, and the QR code for connecting the phone will pop up.

At this time, use the app to scan this QR code and allow pairing.

If your phone is an iOS system, after completing this step, you need to connect the classic Bluetooth in Bluetooth based on the MAC address in the device (the MAC address can be viewed in "Setting About Watches").

Manual connection: After turning on Bluetooth on the phone, enter the app and click on the "Devices" page. Click on "Add Device" and then click on the icon that appears. Finally, click on "Pair". At this time, the app will automatically search for nearby devices. You only need to find the name of the device you own and click to pair.

Connection status: After completing the above operation, slide down at the top of the device dial interface and you will see the "Bluetooth" icon filled in, indicating successful connection.

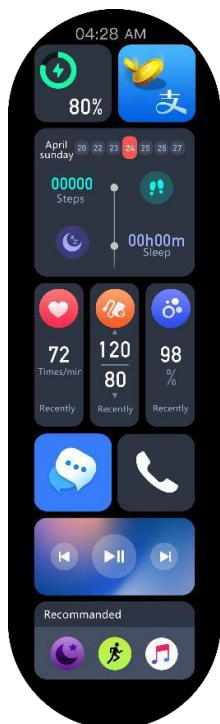

Selection of dial style

1. The device itself provides multiple dial options for you to choose from: when the device is lit, you can switch the dial style function by rotating the encoder.

2. The "dial market" in the app will give you more choices. When you connect to a watch using the app, you can download more styles of dials in the "Dial Market" of the app, and you can also delete the dials.

3. The app also provides the function of customizing the dial. You can customize the dial in the "Device" function of the app.

Operating instructions:

Sidebar: Swipe to the right on the left side of the dial interface to pull out the sidebar, providing multiple quick access functions.

Pull down panel: slide down at the top of the dial interface to pull out the pull down panel, which provides access to a variety of quick functions, and displays time, Bluetooth connection status, and power.

Notification: Slide up at the bottom of the dial interface to view the received notification message. Click on the corresponding message to view or delete it.

Menu page: On the dial page, press the side key to enter the menu page. After entering the menu page, double press the side key to switch menu styles. Press the side key to return to the main dial page.

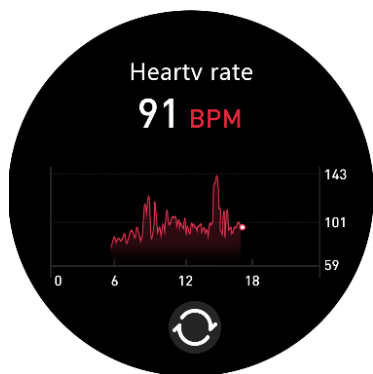

Function page: Click on each application icon on the menu page to enter the corresponding function, right-click to return, and press the side key to return to the main dial.
