Dial switching: Rotary encoder switches dial.

The connection between the watch and the phone

First of all, you need to download the APP "FereFit" onto your phone and install it. There are two ways:

1. IOS/ Android mobile users

Scan the following QR code through the mobile browser.

Downloading and connecting of smartwatch with FereFit APP.

- Download and install FereFIT APP
- Scan QR code with mobile phone to download APP.

• For IOS system, select APP Store, search for FereFIT APP.

• Android system, select Google Play to download and install FereFIT APP Or scan QR code to download.

Note: Your mobile phone must support Android 5.3 or iOS 9.0 or above, and Bluetooth 5.3.

After downloading, there will be a variety of permission reminders during the installation process. Click "Agree" on all of them. One Bluetooth connection is required for the watch and mobile phone: 5.3 to achieve all functions.

For android:

Click on your device in the device list scanned. Connect it directly to Android system.

The smart phone will show a Bluetooth pairing request and you can click on Bluetooth "Pair" to confirm.

HOW TO TURN ON NOTIFICATIONS :

Bluetooth 5.3 connection method: After the installation is complete, open "FereFit" and turn on the phone Bluetooth, FereFitt will be enabled notification prompt, click OK. Click more in the lower right corner, enter the scanning device, search the Bluetooth address and click the connection. Some Android phones need to open the mobile GPS to search the Bluetooth name of the watch.

Bluetooth 5.3 connection method: 1. Open the watch 5.3 Bluetooth 2. Open the phone Bluetooth, click on the name of the watch Bluetooth you want to connect to - follow the prompts to connect the Bluetooth device, and the phone will display "Connected".

How to check whether the Bluetooth connection is successful: Pull the status bar of the watch on the standby screen. When the Bluetooth color of watch 5.3 is blue and green, it indicates that the Bluetooth connection is successful. When the color of the Bluetooth flag is gray, it indicates that the Bluetooth connection is not successful.

Easy solution to common problems: Because the Bluetooth protocol of each mobile phone brand is not uniform, sometimes the Bluetooth connection between the mobile phone and the watch is unstable. You can turn off the Bluetooth of the mobile phone and reconnect it again, or restore the factory Settings of the watch.

How do I set up email notification

Go to Settings - Application Management, find "FereFit" - Permission Management, open all. Re-enter Notification Management - Find "FereFit" with all permissions open.

What if I can't get a notification?

First of all, the notice function of the watch is only synchronous mobile phone notification function, such as telephone letter, QQ and wechat letter reminder, if your mobile phone did not receive the notice, the watch end is also not received, to set the notification function in the mobile phone, find the corresponding APP, to allow the notice to open.
