## Integration CSV Guide

If you are having issues with getting your integration file to work (it probably looks like the below when you open it) then this guide should hopefully help you to reconfigure your file and get our data live on your platform.

## 1. JUMBLED UP DATA ON INTEGRATIONS DOWNLOAD

First open a blank workbook in excel:

2. Click Blank Workbook on the left

From here, head to the Data tab and open 'From Text/CSV'

File Home Insert Page Layout Formu	s <b>Data</b> Review View Automate	Developer	Help		
Get From Text/CSV III From Picture ~ Get From Web B Recent Sources Data ~ III From Table/Range Picture Connection	Refresh All ~ 🕞 Edit Links	Organization	Stocks	Currencies	Geography ⊽
Get & Transform Data	Queries & Connections		Da	ta Types	

3. From Text/CSV

Select your downloaded file in the file explorer and click Import. The following form should appear:

File Origin		Semicolon *		Data Type Detection				
1252: Western European (Windows) *				Based	id on first 200 rows		Lé	
Item Type	Product ID		Product Name	Product	Туре	Product Code/SKU	Bin Picking Number	Brand Nar
Product	6.6712E+12	Academy Stacking Medium Back Visitor Office Chair		Visitor		BR000003		Dynamico:

4. Data Import form

Make sure that the delimiter is set to Semicolon (Excel will likely recognise the delimiter your file is using on its own), and then select load. Your data should now be correctly separated into different columns. The last step from here is to save your file.

Go to Save As, and select CSV UTF-8 as the file type. Once your file is saved, you should now be able to import it onto your website.

5. Save As CSV

If the above doesn't work, please take a screenshot of your eCommerce platform with any relevant error messages and forward these to sean@dynamicos.co.uk
