

SD1

Ultrasonic Pocket Doppler

SD1 Ultrasonic Pocket Doppler

Our newly innovation, the all-in-one compact handheld Doppler, SD1, is a remarkable member of Edan's ultrasound Doppler series. Compared with conventional technology, by using the pulse wave, SD1 breaks through the requirement of the probe angles as well as the depth of the fetal heart. The user can locate the fetal heart rate signal quicker and easier. The extremely low radiation level give you a safer and more comfortable way during application. In addition, aside with professional clinical usage, SD1 is also a user friendly home-based device that allow you to use it anywhere, everywhere.

Features

- ALL-IN-ONE design
- Built in speaker
- Digital display of FHR
- Touch panel for easy control
- Built in Bluetooth
- Volume adjustable
- Android or IOS APP access for tracking baby's development
- 3MHz probe detects fetal heart beat
- Normal AA batteries for easy replacement
- Automatic power-off for battery power saving
- Pulse wave technology

Configuration

Model: SD1 Bluetooth/SD1 without Bluetooth
