## ISLAND FALLS STAINLESS-STEEL SHOWERHEAD

### Installation

1. **TURN OFF WATER SUPPLY TO SHOWERHEAD**
2. Wrap plumber's tape in a counter-clockwise direction 2-3 times around the threads of the shower arm and press the tape into the threads.
3. Screw showerhead onto the shower arm in clockwise direction and hand-tighten. Do not over-tighten.

### Flow Restrictor Removal

For more water flow, a circular plastic flow restrictor can be pulled out of showerhead. If removed, flow rate will exceed 2.5-GPM(9.5-LPM).

### Care and Maintenance

Always blot dry any water from surface of showerhead. Allowing water to evaporate on surface can lead to buildup of mineral deposits. To protect from hard water stains and mineral deposits, use an auto spray wax periodically, rub tips clean with PULSE's Spray-Straight™ performance, and wipe down after each use. Cleaning with a damp, non-abrasive sponge and drying with a clean soft cloth will help keep your showerhead looking beautiful.
