

## **Cleaning Tips**

To properly clean an acrylic bathtub it is recommended to wipe the surface with a damp cloth or sponge using, Clean\*Way, household soap or liquid detergent. Stubborn dirt or stains may be removed using Spic & Span in powder form or equivalents. DO NOT use any cleaning products containing abrasive or solvents since these could dull the brilliant surface or cause crazing. Products like Bon-Ami, Comet, Ajax, Scrubbing Bubbles, Lysol, or Windex are not recommended. Harsh chemicals with any alcohol, amonia, or acid content should never be used on acrylic surfaces which can cause crazing. Avoid using aerosol products on the bath surface.

Whirlpool Systems: It is necessary to regularly clean your American Acrylic Whirlpool System. Normal cleaning should be performed once a month. Even though most of our products, (including the external piping), contain built in anti-microbial additives, we suggest cleaning the piping of the system.

Fill your bathtub with warm water.

- 1. Add 1 cup of Clean\*Way which can be purchased directly off this website.
- 2. Turn your system on and allow it to run for about 10 minutes.
- 3. Drain bathtub.
- 4. Fill your tub once again with water and allow your system to run another 10 minutes, purging all soap from the lines.
- 5. Drain tub. You should now have a clean and sanitary whirlpool system.
