DC or Battery

Light (Red) indicator
or low power or
something under it

Description

5 Seconds™ Touchless Hand Automatic Dispenser is easy to use, Just put your hand under the sensor to start the Automatic Dispenser, you can effectively avoid cross infection without touching the Automatic Dispenser. It is ideal for use in offices, schools, warehouses, food service facilities, manufacturers, medical facilities, and many more locations! It is crafted with top dispensing technology making it completely hands-free for improved hand hygiene. Our product is ADA compliant & easily accessible to people with disabilities. The Automatic Dispenser is constructed with ABS plastic making it resistant to chemicals, heat, & impact. This automatic dispenser is made to provide long-lasting strength and use. Quick & Easy hand disinfection helps eliminate contamination without physical contact with the Automatic Dispenser. Quiet, powerful battery-operated Automatic Dispenser uses four C batteries (not included) or optional DC connection. Automatic Dispenser is equipped with lock & key. Ergonomically designed and easy to install.
