

OPERATING MANUAL – JEEVES

**! IMPORTANT FOR END-USERS DO NOT THROW AWAY !
READ AND FOLLOW INCLUDED INSTALLATION GUIDE BEFORE USE**

WARNING:

BEFORE POWERING UP, ENSURE UNIT IS INSTALLED
WITH HARDWIRING LOCATED AT THE BOTTOM
AS SPECIFIED IN INSTALL GUIDE

Per the installation instructions, unit must
be hardwired to a separate switch or timer:
If wired directly without a switch, unit will
remain on permanently

You should start to feel some heat after 5–10
minutes

Units typically take 15–45 minutes to reach its
top temperature

Leave unit on for at least 1-2 hours to dry and
get your towels warm

These units are safe to leave on 24/7

HOW TO FOLD YOUR TOWELS?

Fold your towel in half length-wise or width-wise and then drape
over the top bar. For best results, ensure towel covers all bars with
minimal overhang. Note - for larger towels, they may need to be
folded in thirds to fit.

HOW TO CLEAN YOUR HEATED TOWEL RACK?

For best results, turn off unit and wait for it to return to room
temperature, then wet a soft cloth with warm water and mild
soap and wipe surface. Dry off with a soft, dry towel. Never use
an abrasive cleaning pad or product as this could scratch the
finish or paint. Stainless steel cleaner should not be used on any
painted finish. Stainless steel cleaners can also be used on any of
the stainless finishes.
