SOFT CLOSING DOOR HINGE

SOFT CLOSING DRAWER SLIDES

SOFT CLOSING HINGES & SLIDES

All vanity cabinets stocked by TheTubConnection.com include soft closing door hinges and drawer slides.

What this means:

-Our hinges and drawer slides act as a buffer to slow your door or drawer down and finishes closing them gently. This keeps your drawers and doors from slamming shut, which greatly extends the life of your cabinet!

-These cleaning and maintenance tips will help keep your cabinet looking and working great for years to come.

GLASS TOPS/SINKS

-Use of gloves is highly recommended.

-Glass counter tops and sinks have a frosted coating on the bottom. DO NOT attempt to clean this off. Attempting to clean this can leave an uneven coating and disturbs the visual appeal.
