Color & Essence

By Denise Turner, ASID, CID, CMG

Color and light have captured the imagination of some of the greatest thinkers in history most notably Hippocrates, the Father of Western Medicine. He is known to have incorporated Chroma and Aroma Therapy into his practice with the use of colored ointments and salves.

Mr.Steam® has now revitalized the healing powers of color and light in the ChromaSteam™ and AromaSteam™ Systems. The Mr.Steam Chakra blends are specially formulated essential oils extracted

from organic flowers and plant material designed to balance your body to its maximum wellness while working in conjunction with the corresponding ChromaSteam™ System light colors.

The use of essential oils and colored lights is a wonderful way to balance and cleanse the Chakras and attune oneself to love and light.

Let's explore the body's seven major Chakras or energy centers positioned along the spinal column which correspond to certain colors and essences.
