

## GRC CEMENT TABLES.

GRC (Glass Fibre Reinforced Cement) is a robust material produced to combine the characteristics of strength, toughness and water resistance making it an ideal material for use in outdoor furniture. The legs are constructed from Aluminium and coloured in a powder coat finish to match the GRC top.

Each GRC cement table is hand painted which may result in a slight colour variation but making each table unique.

GRC cement tables require very little maintenance to keep them looking new. For daily care and spills, simply wipe clean with a soft, dry cloth. To remove dirt and grime, wipe clean with a soft damp cloth and mild detergent solution as required.

To protect the finish, avoid the use of abrasive chemicals and rough cleaning pads and polishes.

To guard against fading, it is recommended any outdoor furniture exposed to direct sunlight or the everyday elements be protected by the use of outdoor furniture covers. For cushions exposed to direct sunlight or the everyday elements, we recommend storage when not in use.

### GRC Production Process
