

### WATER RESISTANCE AND BREATHABLE

- Exceptional water resistance
- Revolutionary Shield porous membrane layer with structure allowing vapor to come through
- Solve the problem of regular PVC cover that cause mold and mildew to form inside the cover

### TEMPERATURES TOLERANCE

- Withstand extreme cold weather and accidental touch on hot surface
- Does not crack in -35°F weather
- Does not melt on hot grills, 350°F tolerance for **Platinum, Titanium & Mercury** covers (but we do not recommend putting covers on hot grills)

### COLOR FASTNESS

- Solution-dyed polyester fabric withstands fading over time
- Analogous to carrots and radishes when compared with traditional fabric in other covers
- 1000-1500 UV hours
