

SKY Angel 911 FD User's Guide

DEVICE CHARGING:

For the first time of use, please fully charge the unit for at least 2-3 hours.

Using the USB charger or using docking station to charge

- Place the device on the docking station.
- Connect the Micro USB side of the cable to the docking station port and connect the other end of the cable to the designated AC power source (USB/AC adaptor)

SWITCHING THE DEVICE ON AND OFF:

- **To turn on the device:** press the side power button for 1 second. All the LEDs will flash rapidly. Device can be also turned on automatically by charging via USB or putting it into the docking station.
- **To turn off the device:** press and hold the side button and SOS button together for 1 second until the LEDs is off.

WATERPROOF:

SkyAngel 911 is 100% waterproof and can be briefly worn in the shower or even submerged under water for short periods of time. Do not allow the device to be soaked for prolonged periods of time.

PLEASE NOTE: *Do not remove the back cover at any time; this will break the waterproof seal. Also removing the back cover voids any and all warranties.*

WHAT DO THE FLASHING LIGHTS ON THE SIDE OF THE UNIT MEAN?

Charging Status – Blue Light:

- Blue light is on solid; unit is charging
- Blue light is blinking quickly; unit has less than 15% power and should be recharged
- Blue light is blinking very slowly; unit is fully charged and has GPS satellite signal

Cellular Status – Green Light:

- Green light single flash every 3 seconds; unit is connected to a cellular network
- Green light is flashing very rapidly; unit is contacting 911

TESTING THE SYSTEM:

We recommend that once you receive the system, you test it as soon as possible. Press and hold the SOS button for 3 seconds until the device vibrates. The green light will start to flash rapidly to confirm that the unit is about to make a call to 911. After that, the unit will call 911. Once 911 answers, do not hang up. Inform 911 that this is only a test. To end the call, press the SOS button.

ACTIVATING AN SOS ALARM:

Press and hold the SOS button for 3 seconds until the device vibrates, and the green light will start to flash rapidly to confirm that the unit is about to make a call to 911. After that, the unit will call 911. If for some reason 911 fails to answer, the unit will start to dial the numbers again after 5 minutes. This will continue until one of the phones answer the call. To end the call, press the SOS button.

AUTOMATIC FALL DETECTION:

When the unit detects a fall for at least 2 feet above the ground, it will begin to beep. This is to detect that it has detected a fall and will soon begin to call 911 automatically. After about 10 beeps it will call 911. To cancel the call before it calls 911, press the SOS button to disconnect.

GPS LOCATING:

The precision that 911 will be able to locate the unit can range from several feet to hundreds of feet. This unit has full two-way communication and that should be the primary method to direct assistance to the user.

LOW BATTERY ALARM:

The SkyAngel 911 has a Low Battery Alarm. When the battery on the unit gets to less than 15%, the blue light on the unit will flash rapidly to warn the user that the unit needs to be charged.
