Measure an existing ring

If you measure the internal diameter of your ring (in mm) it should match with the corresponding size in the ring chart below. Be sure to use millimeters.

Ring Sizing Guide

Measure an existing bracelet

1. Find a bracelet which fits you correctly and lay it down flat.
2. Measure from the clasp to the end of the bracelet and order the size which is closest to your measurement. To ensure it fits comfortably, we suggest adding half a cm for comfort. You can add or subtract by half a cm to whether you prefer a loose or tight fit.
