- Stimulates internally and externally
- Designed for all genders
- Unassumingly powerful
- 3 intensity levels
- 3 vibration patterns
- Medical-grade silicone
- Water resistant

Connect with
Bluetooth

Guide To Anal Play

Anal stimulation can be pleasurable for everyone, as it heightens sensations in your sensitive nerve endings. Use the Analise vibe on yourself or your partner, for foreplay or during sex.

Consent Is Key

Never surprise your partner; always ensure you've received enthusiastic consent.

Go If You Gotta Go

B-hole stuff can get messy. We recommend using the bathroom an hour before you use your vibe.

Relaxation Is Key

Be gentle with your body. If you're stressed or nervous, your body will tighten up.

Lube Is Your Bestie

Liberal use of a water-based lubricant to reduce friction, re-apply often. Silicone lubricant should not be used with your Analise vibe.

Feel Free to Warm Up

You can always use fingers to get your b-hole ready.

Take It Slow

Insert slowly, take breaks if you need to, and start your vibe on the lowest setting.

No Double Dipping

Don't touch the vulva with the same hand, your mouth, or with a vibrator after it's touched the anus, to avoid spreading bacteria.

Aftercare

Clean your vibe using antibacterial soap and warm water. Wash and dry thoroughly, then store in a clean, dry place out of sunlight.

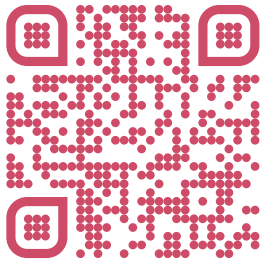

Hope you're ready, this vibe only gets better...

Connect to the Vibes Only app to unlock a whole new world of self-love where you'll handpick your own fantasy and become the main character. Your vibe will work in tandem with the erotic reverie for a full-blown journey into orgasmic bliss.

And that's not all -- get exclusive video content from the pros on sex, dating, pleasure, and more. We hope you'll learn, laugh, and love it.

Get connected

Scan this code to download the Vibes Only app on your phone.

Start vibing

This vibe comes partially charged. To get it all the way up, charge before use.

On your vibe, hold down the power button for two seconds to turn on.

Your bluetooth will be enabled when the device turns on. The light will flash to indicate it is discoverable.

The app will detect your device. Select it, and your vibe is synced!

To adjust intensity and patterns manually: Click the button to cycle through the steady speed levels, then the patterns.

Power your vibe

Charging instructions

If your vibe is feeling a little lowkey, it may be time for a charge.

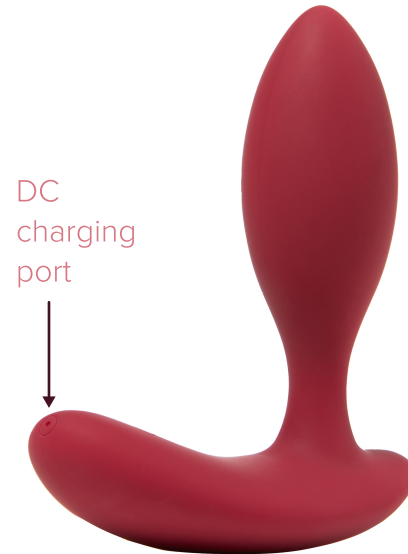

Due to the unique design, each Vibes Only model charges slightly differently.

First, plug your USB cord into a standard charging block (high-power charging blocks may damage the battery).

Insert the DC jack (long skinny piece) into the small circle opening (tight hole) on the bottom of your vibe. Be gentle, but firm, until it's in as deep as it can go.

The light on your vibe will flash to indicate that it's charging.

When it is fully gassed up (approx. 2 hrs) the light will change to a steady glow.

Care for your vibe ...and it will love you back!

Care instructions

We can't recommend using a water-based lubricant enough, such as Vibes Only Juiced Up. Avoid using a silicone-based lubricant as this could kill your vibe.

Wash your vibe with antibacterial soap and water. Wipe with a dry cloth or air dry. Store in a cool, dry place and keep your vibe away from toys made of other materials. Remember to charge periodically to maintain the battery life.

What not to do

- Use with oil-based massage oils or lubricants as it may damage the vibe.
- Leave your vibe in direct sunlight or ever expose it to extreme heat.

Troubleshooting

Your vibe's light does not pulse when the charger is connected? This could be why:

- Battery is fully charged (go off!)
- Battery is drained and will require several minutes to recognize that it is being charged.
- Charger is not properly connected. Check your charging block and charging pin.

Your vibe does not connect with your phone when the button is pressed?

- Battery is drained and your vibe requires charging.
- Make sure your app has been given permission to access bluetooth on your phone settings.
- Your bluetooth on your phone is not enabled. Make sure to enable, or reset your phone if needed.
- You have exceeded the 10 seconds required for your vibe to 'find' a device. Reset both your vibe and your phone by turning off, waiting 30 seconds, then turning on. Now try again making sure your phone has fully restarted, with the bluetooth switched on. Open the Vibes Only app and turn your vibe on.

If you experience any other problems with your Vibes Only product or have any questions regarding operation, download the app for instructional videos or please contact help@vibesonly.com.
