

FootHemp

From Grass to Feet

ABOUT

FootHemp was born from three co-founders with a combined experience of 75 years in the shoe industry. Together we formed the idea that we can make great footwear products and accessories leveraging all the benefits of hemp.

With offices in Alicante, Spain

and Portland, Oregon

Influenced by the culture of Portland and surrounded by all things hemp in Alicante, it was natural to look back in history and see how amazing hemp was to our ancestors but even more useful today with climate change and wasteful water consumption.

We concentrated our efforts to capture the main benefits of CBD. We developed a patent pending insole design that is not only sustainable but provides the soothing, and relaxing comfort of CBD.

CBD Insole

An insole unlike any other on the market. An innovative, patent pending design to bring amazing comfort, soothing sensation and relaxation to tired feet.

Built maximizing the use of hemp, one of the most sustainable materials available while providing amazing all day comfort and performance. With our proprietary process, the only insole infused with CBD.

- At least 210mg of micro-encapsulated CBD is infused on each insole. Slow releasing micro doses of CBD provide end of day soothing relief and relaxation to tired, sore feet.
- Naturally antibacterial for odor control. Go without socks with no worries!
- No adhesives or glues used so no out gassing from volatile organic compounds. Our CBD Insole smells great!
- HempGel, our gel composite of recycled SEBS rubber and hemp fibers to provide shock absorption, high energy return and long durability.
- Contains no animal products and no animal based materials used during manufacturing, completely vegan!

CBD Wrap

Expanding on the concept of providing reduced inflammation, soothing sensation and relaxation to tired feet, we developed the CBD Wrap.

Hemp fiber is the base of this product providing a perfect antibacterial carrier for hemp oil infused with 30mg of CBD. The perfect end of the day gift to your tired feet. When finished you have the comfort of mind knowing it is completely compostable.

- CBD to provide soothing relief and relaxation to tired, sore feet.
- There is 30mg of CBD in each wrap. A perfect dose for soothing achy tired feet.
- Hemp oil to moisturize your skin without clogging pores. It can even help to balance out oily skin, hydrating it and regulating the skin's oil production.
- One of the omega-6 fatty acids that hemp oil contains is gamma-linolenic acid (GLA), which acts as a powerful anti-inflammatory while simultaneously encouraging skin growth and new cell generation.
- What makes hempseed oil so beneficial to the skin is that it's rich in omega-6 and omega-3 fatty acids. These nutrients can help to treat skin conditions like atopic dermatitis.
- The wrap fabric is made from hemp fiber. Nature's amazing material that naturally absorbs toxins, antibacterial and anti-fungal.
