## Ring Size Tool

You have 2 options to measure the size of the ring:

## Option 1:

Measure the Diameter of an existing ring by using the circles below to judge sizes against your existing ring. When using your existing ring, make sure you line the circles up below with the inside of your band to get an idea of the size.

## Option 2:

Measure the Circumference of your finger by using a small piece of paper, a thread or a string and a ruler. Wrap the string around the base of your finger and firmly hold on to the point where the two ends meet. Now, measure the length of the string and use our size chart below (right) to see which size will fit you best. Another option would be to cut out the circles and see if you can fit your finger through it. When cutting out the circle, make sure to be precise.
