TWO POSITIONS HINGE – X229300

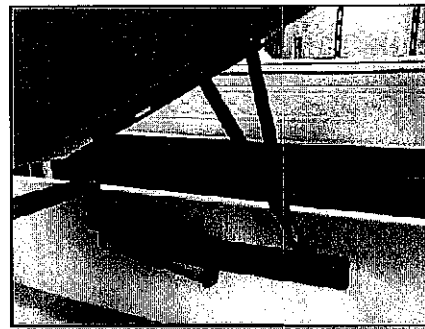

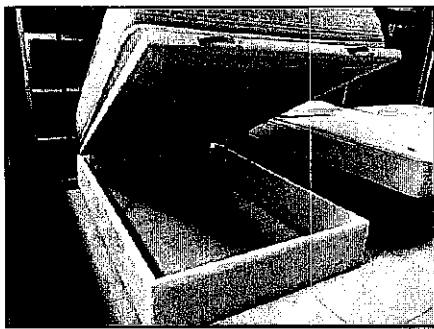

PATENT Nº U201930283

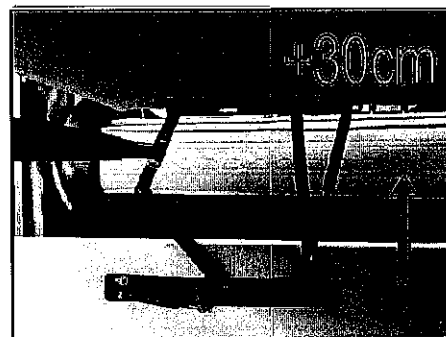

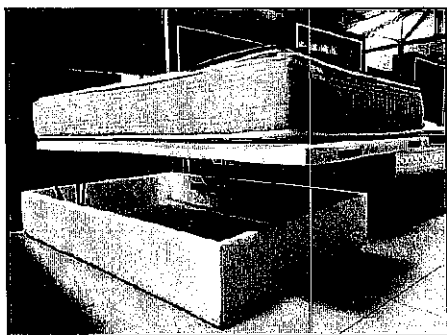

The Two Positions Line Hinged is an evolution of the Standard Hinged, this System allows lifting the lid of the storage bed, vertically and horizontally, making it possible to raise the bed 30 cm.

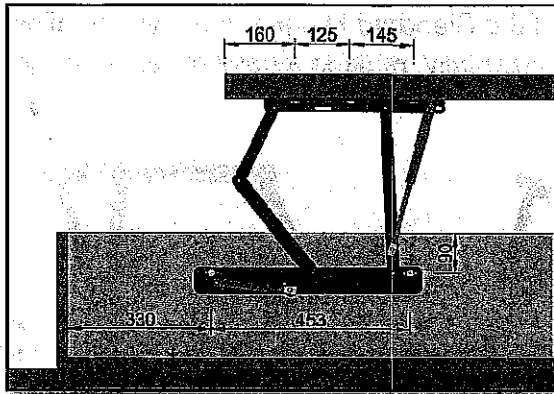

With this set of hinges you can use as traditional storage bed since the anchor and opening of the mechanism is identical to the standard hinged.

Hinged Set for storage beds. It may be lifted up into two positions, it opens to store objects or it lifts up to help bed making.

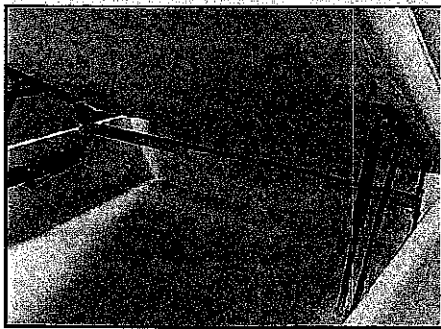

- Attach the hinged mechanisms to the inside walls of the base.
- Fast the screws to the underside on the mattress platform
- The image shows the measurement for the anchoring to the storage bed.

(The measurements, in millimeters, are indicative and symmetrical for both sides of the storage bed)

GAS SPRINGS AND STABILISING STRUT

The Line Model Hinged System includes 4 gas springs and the stabilizing strut, giving more rigidity when opening, lowering and closing the lid.

Gas spring:

- 2 small gas springs of 700 N (bed 80-110 cm) or 800 N (bed 120-160 cm).
- 2 main gas springs forces will depend on the bed size. See below the guidance table.

BED WIDTH

This Set of Hinged can be settled in different size of bed.

STORAGE BED WIDTH (CM)	PRINCIPAL GAS SPRING FORCE	REFERENCE
80-90	800N	011615001
105	900N	011635001
120-135	1000N	011460001
150	1150N	011636001
160	1250N	011637001
