ABOUT | Who are we?

Inspired by the casual modern lifestyle, **omosa house** is a contemporary design company based in California...a land where casual living embraces all world cultures. You' ll find the glamour of Hollywood, the brilliant minds of Silicon Valley, the rich fields of sunny farms inland, the sophisticated wines of coastal vineyards and, of course, the majestic views along the entire coast.

At **omosa house** , our core values are built on tackling the environmental and the social challenges that we face today. All of our handcrafted pieces embrace eco-design innovation using sustainable materials, refined engineering, green manufacturing and best-in-class craftsmanship as we combine an authentic blend of solid hardwood furniture with high quality proprietary natural oil finishes for your family' s healthy living. We believe the best products are the ones that will age well and stand the test of time.

Live comfortably in the warmth of modern Californian living...live better with **omosa house** .

The **omosa house** brand was created by Maria Yee Design Studio, which has been in the home furnishing business in the US for over than 30 years.

Our headquarters is in San Jose, California, USA, and we have an independent showroom in High Point, North Carolina, where the High Point Tradeshow Exhibition is held. Another brand from Maria Yee Design Studio, Sun at Six, is located in New York to access the world' s most advanced and cutting-edge design trend information.

Dealer cities are mainly located along the east and west coasts, with more than 200 points of sale throughout the United States.

ABOUT | What makes us special?

Our passion and purpose is to marry the beauty of warm natural hardwoods and eco-sustainable product innovation with functionality, modern clean lines and impeccable details.

All of our furniture pieces...

- Are manufactured with 100% solid hardwood
- Use proprietary Nicia Oil finish. It is a natural material, very durable but low maintenance
- Use water-based adhesives
- Use European premium fabric with high performance.
(All fabrics are tested by German lab. They do not only meet the residential use but exceeds American five star hotel' s hospitality specifications)
- Use European hides which are produced with best-in-industry practices to reduce environmental impact by applying new technologies in the tanning process
- Stone made with natural material with European technology. Durable and low maintenance
- Add no formaldehydes and low VOC for your healthy living
- Are design-compliant with all US safely standards

Maria Yee established its factory in 1998 and has owned two of its own manufacturing campuses since 2003 in Guangzhou and Hunan China – total of 100,000 square meters. Everything is made under our own roof to better control the whole process - from design to quality standards.

At **Maria Yee, Inc.** we value, respect and support the well-being of our workers. In addition to operating one of the greenest furniture factories in the world, our eco-conscious principles in design and manufacturing extend into our social-conscious values.

Factory certifications include:

- ISO 9001 Certified: Quality Management System Certification
- ISO 14001 Certified: Environmental Management System Certification
- SA8000® Standard Certified
(The SA8000® Standard helps secure ethical working conditions for millions of workers globally.)
- Forest Stewardship Council® Chain of Custody

ABOUT | Craftsmanship

Maria Yee spent ten years working to innovate, redesign, and reengineer the beautiful classic Chinese joinery system with solid hard wood.

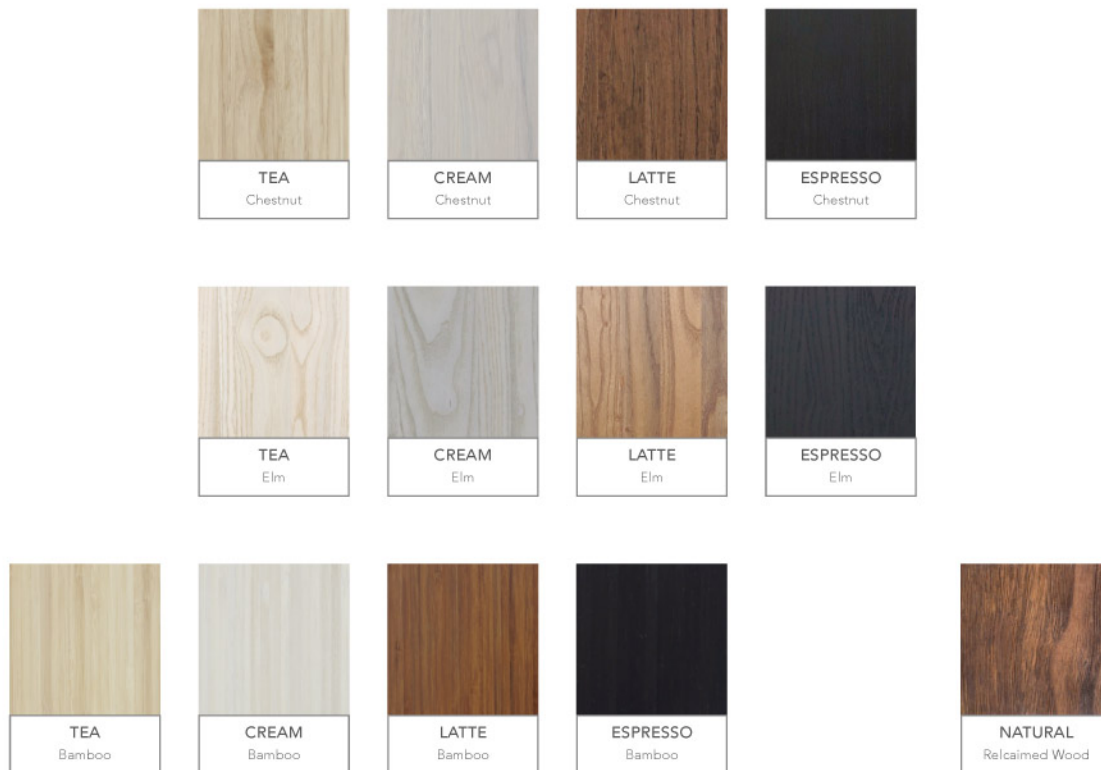

All our furniture is made with solid hard wood with this new modern joinery structure without nails and screws.

Our furniture is found all over the world. With the advantages of modern design and production methods, our furniture can adapt to a variety of extreme climates, whether facing the hot and dry climate of Dubai, the freezing temperatures of Alaska, or even the humidity of the Florida coast, Maria Yee wooden furniture will have almost no warping or cracking issues. In the past years, our average return rate is below 0.5% .

MATERIALS | Hardwood + Bamboo

Our hardwood materials are responsibly grown and selectively harvested. No species from the rapidly-diminishing tropical rainforests are used. For select products, we use reclaimed wood from end cuts at our factory to prevent waste and to promote environmental activism. Our patented BambooTimbre™ is made 100% from pressed Moso bamboo. This rapidly renewable material can be harvested in a five year cycle and regenerate from the original plant. Each piece is hand selected to highlight the beautiful grain patterns and variations in the end product.

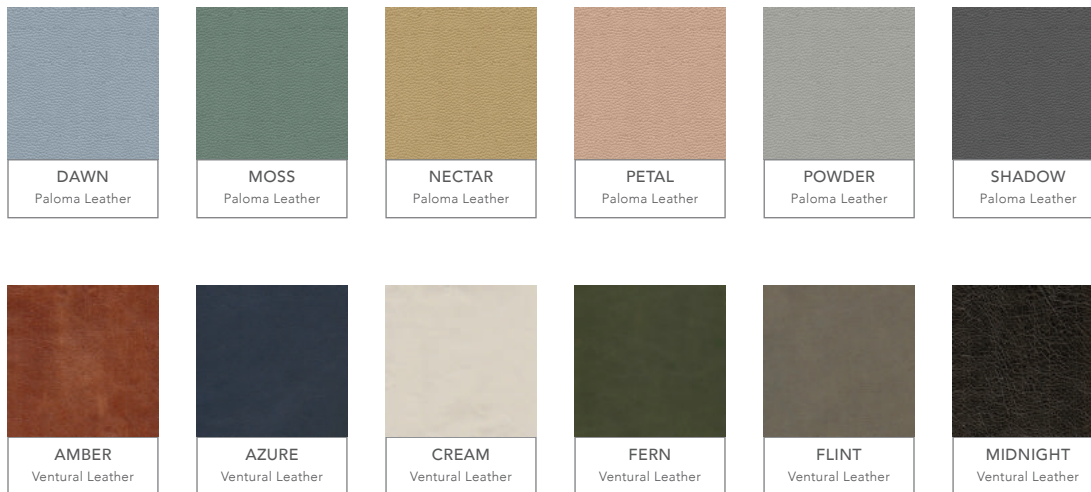

MATERIALS | Fabric

Our selections of high-quality European fabrics have not only been produced with innovative technologies to ensure easy cleaning and high durability, it also exceeds American Hospitality standards. Each fabric is matched with the product design to enhance its beauty and functionality. High thread count and double stitching help prevent the cloth from unraveling with natural wear and tear. All fabrics are abrasion resistant, char resistant, and are easily spot-cleaned.

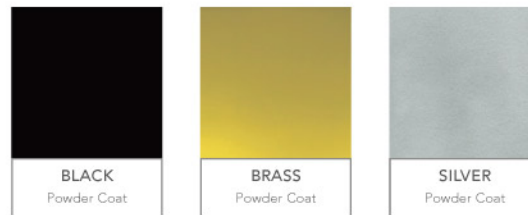

MATERIALS | Leather

Our Paloma extra thick top grain European leather is sourced responsibly from end to end of the supply chain. From responsible farming methods to an innovative, sustainable tannery which uses far less water than traditional methods and largely runs on solar power, this leather is of the highest quality both aesthetically and ethically. The tough and durable surface, with little to no markings, is high-performance and low maintenance. This leather is stain resistant, easily cleaned, and has a naturally smooth texture for long lasting comfort.

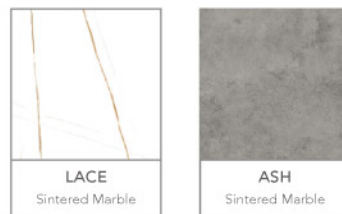

MATERIALS | Steel

Our steel products have various finishes to match a wide range of design styles from traditional to modern. We offer powder coated steel options which have a matte texture, brushed steel for a bit of texture variation, and a satin finish which gives off the most even shine.

MATERIALS | Sintered Marble

Our Sintered Marble is composed of stone and a variety of natural minerals fused together to create a high performance material. It is stain, scratch, heat, and UV resistant. It is also food safe and very easy to clean. Each piece is unique in the patterns formed for a beautiful and natural stone look and feel.

PRODUCT CARE

Hardwood

Place your piece away from the sun, intense light and heat sources. To prevent damage to the finish, avoid direct contact with alcohol or hot food. Place felt pads on items that may scratch table surfaces.

Dust regularly. Wipe clean as needed with a soft, dry cloth. Rub gently along the grain to stave off new scratches. Avoid alcohol-based cleaning products. For regular cleaning, use lukewarm water and mild soap or a solution of one ounce of white vinegar for each quart of water. Nicia oil is water-resistant, not waterproof. Clean spills with a cloth quickly and thoroughly.

Leather

Place leather furniture away from the sun, intense light and heat sources. Direct contact with alcohol and hot food can ruin the finish. To keep up the good look and soft feel, dust with a soft, clean cloth regularly. Clean up spills with fresh, absorbent cloth quickly and thoroughly.

To remove slight stains, prepare lukewarm water solution with mild soap. Diluted, gentle detergent such as shampoo can also be used instead of soap. Sponge the whole surface sparingly, evenly and quickly. Let the leather surface dry completely. For more complicated situations, it is best to get professional help.

Fabric, Cleaning Code W / S

Spot clean only with water based shampoo or foam upholstery cleaner. Pretest a small, inconspicuous area before proceeding. Do not over wet. Do not use solvents to spot clean.

Water-free cleaning only by a professional service specializing in upholstery.

Hardware

Any hand forged iron or brass hardware should be wiped clean with a soft, dry cloth as needed.
