

## VITAYERDE F1 (U)

Bright Green

70 days

A vibrant green cauliflower with firm, heavily segmented curd. A fast grower with an upright plant habit. Vitaverde prefers cool conditions for optimum size and performs well in spring, summer and fall slots. High quality heads are eye-catching, especially displayed with other colorful varieties.

## CHEDDAR F1 (U)

Orange

70 days

Cheddar makes a medium-sized, bright orange head with elevated levels of beta-carotene. The curd maintains a brighter color if the head is not shaded. The color stays true when cooked and the flavor is mild and sweet.

## CLEMENTINE F1 (U)

Vibrant Orange

70 days

Vibrant orange cauliflower for fresh market and processing. Clementine's uniform heads and firm curds are deeper orange and slightly smaller than Cheddar and Flame Star. Vigorous plants provide some head cover. Great field holding.

## FLAME STAR F1 (U)

Pastel Orange

75 days

Beautiful, pastel orange cauliflower that performs best when planted in spring or fall. Flame Star is a medium-sized plant that will produce good yields of smooth, dense heads.

## ROMANESCO

Resistance

## ORBIT F1 (U)

70 days

Early maturing Romanesco with uniform, bright green curds. Orbit has a more rounded shape compared to other peaked varieties. Concentrated harvest of 1 lb crowns with an excellent wrap.

## 26-701 RZ F1 (U)

HR: Mb

75 days

Puntoverde type with pronounced central peak and very little bronzing. 26-701's large, vigorous plants were bred to handle the heat, but highest quality crowns are from spring and fall harvests.

## VERONICA F1

HR: FY

77 days

Bright green Romanesco that does well planted in summer for harvest throughout the fall. Veronica has a wonderful, nutty flavor.

## NEW! WHITAKER F1 (U)

80 days

The first white Romanesco. Tight, uniform white spirals suitable for fresh market or processing. Vigorous upright plants make for easy and clean harvests. Best for summer and fall harvest.

### TURK'S TURBAN (U)

8" x 16"

95 days

This colorful gourd displays well for fall market sales. Turk's Turban really stands out with red-orange shoulders and a protruding turban of red, green and white stripes.

### BIG GORDON F1 (U)

9" x 24"

100 days

A large, warty, spoon-shaped gourd with excellent shelf life for ornamental displays. Varying colors with twists and warts on each fruit.

### GOURDTASTIC F1 (U)

6" x 10"

100 days

Interesting rocket-shaped gourd with deeply winged base. Fruits are primarily brilliant orange. Gourdtastic dries well for displays.

### LUNCH LADY (U)

Varies

100 days

Lunch Lady is a wild mix of large, colorful, warty gourds. Fruit vary in shape and size ranging from 12-24" and 18-36". A must-have for retail sales.

### NEW! OH MY GOURD! F1 (U)

Varies

100 days

Unique shapes and sizes in this large sized mix. Solid and multicolored, smooth and warty and excellent shelf life and powdery mildew resistance. Fruit vary from 5-9 pounds.

### NEW! GOURDOSAURUS REX F1 (U)

Varies

100 days

Extra large gourds (10-13 pounds) in a mix of colors and sizes. Good shelf life and powdery mildew resistance.

### APPLE (U)

7" x 9"

110 days

Large, dark green, apple-shaped fruit turn light brown when dried and are excellent for painting and crafts.

### SPECKLED SWAN (U)

10" x 16"

120 days

Sensational swan shapes are great for crafting. Once dried the smooth exterior can be painted or decorated.

### BIRDHOUSE (U)

8" x 14"

125 days

This popular gourd has a unique bottle shape that is perfect for ornamental displays and can be dried for making birdhouses and other craft items. Harvest when skin turns from green to white/tan. Dry before painting or carving.

## JALAPEÑO

### LA BOMBA II F1 (U)

Dark Green | 3" x 1"

65 days

2,500 - 3,000

Early maturing, fresh market jalapeño with good flavor balanced with medium heat. Tall, upright plants offer good leaf coverage to protect fruit from sunscald. Sturdy plants can be grown in containers. HR: Xcv 1-3; Tmv

### NEW! MIXTECO F1 (U)

Dark Green | 4" x 1.5"

68 days

2,500 - 3,600

Early maturing and uniform large fruit. Heavy, thick-walled fruit on strong plants with good regrowth. IR: Xcv 1-3

### RAIDER F1 (U)(T) (PC)

Dark Green | 4" x 1.25"

75 days

3,000 - 4,000

Very high yielding jalapeño with outstanding fruit quality. Raider's strong plants with good foliage cover produce an abundance of very dark green, cylindrical fruit.

### MAMMOTH F1 (U)(T)

Medium Green | 4.75" x 1.75"

77 days

2,500 - 3,000

This vigorous jalapeño will produce heavy yields all season long. Mammoth is an industry standard due to its high quality breeding, uniformity and impressive size. IR: PVY, TMV

### NEW! CATARINO F1 (U) (Osborne Exclusive)

Dark Green | 4-6" x 1.5"

78 days

4,000 - 6,000

This vigorous Large dark green fruit with very thick walls and heavy weight. Good shelf life and vigorous plants with high yield potential. IR: Xcv 0-3,7,8

## POBLANO

### NEW! WALAMO F1 (U)

Dark Green to Chocolate | 6.5" x 3.25"

85 days

500 - 1,000

A replacement for Marques—geared for dependable field performance, with early maturity, adaptability and high, consistent yields. Fruits are large, heavy, smooth, and uniform with a high percentage of 2 lobed fruit.

### NEW! MASCOTA F1 (U)

Dark Green to Red | 7.5" x 3"

85 days

1,000 - 1,500

This large-sized pepper has great fruit quality with thick walls and deep green color. Strong plants have a heavy early set and bacterial leaf spot tolerance.

## PASILLA

### SALVATIERRA F1 (U) (AS)

Dark Green to Chocolate | 8.5" x 1.5"

80 days

700 - 1,000

Hybrid pepper that's vigorous and productive with heavy yields. Plant is upright and supports itself well, but trellising is beneficial. Ripens to a very dark chocolate color with good heat and uniform size and shape. Mild spice, good for drying. AKA Holy Mole. HR: Tm 0

## PADRON

### PADRON (Organic)

Green | 2" x 1"

60 days

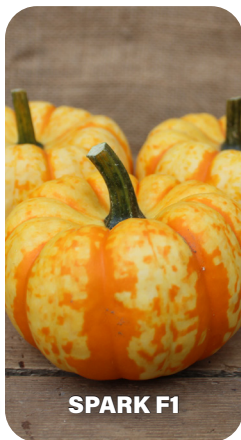

500 - 2,500

Tall plants yield many flushes of small, bright green peppers with mild flavor.

VARIETY	DTM	AVG (LB)	PLANT HABIT	RESISTANCE	MINI
					DESCRIPTION
CASPERITA F1 (U)(T) 🍂	80	0.5-1	Semi Bush	IR: PM, WMV	Ribbed ornamental white fruit that pairs well with Orangita and Midnight. Fantastic yield, very early and easy to harvest. Perfect for the top of any stack or as a table top display.
MIDNIGHT F1 (U)(T) 🍂	80	1-1.5	Semi Bush	IR: PM, WMV	Flattened, acorn-like pumpkin that is a cute, personal size with great flavor and high sugar content. Pairs well with Orangita and Casperita.
ORANGITA F1 (U)(T) 🍂	80	1-1.5	Semi Bush	IR: PM	Orangita is a unique flattened oval, deeply ribbed with high yields of attractive, deep orange fruit. Pairs well with Casperita and Midnight.
SUNSHINE F1 (U)	80	1-1.5	Semi Bush	IR: PM, PRSV	Bright yellow mini-pumpkin that makes a great companion to Casperita and Orangita. Yellow color holds well after harvest. High yields and semi-bush habit for an easy harvest.
NEW! SANDITA F1 (U)	80	1-1.5	Semi Bush	IR: PM, PRSV	Flattened acorn-shaped pumpkin with unique buff-tan color. Semi bush habit for easy harvesting.
LIL' PUMP-KE-MON F1 (U)(T)	90	1-2	Bush		Unusually colored, flattened mini pumpkin has a creamy color with flecking and ribs emphasized by bright orange stripes. The color of the stripes intensifies with maturity.
SPARK F1 (U) 🍂	90	0.5-1	Vine	IR: PM	Light orange-yellow skin with dark orange stripes and flecking. Extremely uniform with distinctive coloration, wide ribs and firmly attached handles.
WEE B LITTLE F1 (U)(T) 🍂	90	0.5-1	Bush		This true mini pumpkin has precocious fruits with very light ribbing. A great yielder that's perfect for pairing with any small gourd mix.
NEW! PHANTOMITA (U)	90	1-1.5	Semi Bush	IR: PM,	Ribbed ornamental fruit with unique tricolor striping Fantastic yields on open, semi bush plants.
KANDY KORN PLUS F1 (U)	90	1-2	Bush	IR: PM	This little, early maturing, dark orange pumpkin proved to be a heavy yielder with 8 to 10 fruits per plant in our trial fields. Pairs well with Icicle.
SNOW DROP F1 (U)(T)	95	0.5-1	Full Vine		Your customers will love these mini, white, true-pumpkin-shaped fruits. Long, well-attached handle adds to the unique look. Pairs well with Baby Bumps and Kandy Korn for a festive fall mix. See image and pricing on pg. 92.
NEW! SENORITA (U)	95	1-1.5	Semi Bush	IR: PM, WMV	Flattened ribbed ornamental pumpkin with yellow and orange coloring. High yielding semi bush habit.
GOLD SPECK F1 (U)(T)	95	0.25	Bush	HR: PM	High yielding mini pumpkin is smaller than other minis with long, slender handles. Fruits grow close to center of the plant in clusters making it easy to harvest. Pairs well with Baby Boo.
BABY BOO (U)	95	0.25-0.5	Semi Vine		Unique, white mini with deep ribs that pairs well with Spark and Gold Speck.
JILL BE LITTLE (U) PVP	100	0.5	Vine	IR: PM	Classic mini orange fruit have heavy ribs and improved disease resistance.

# TOMATO

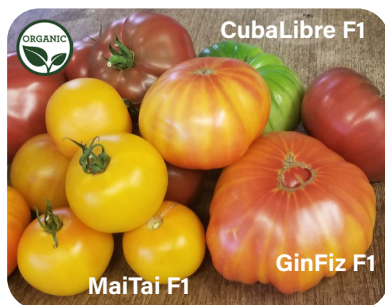

## HYBRID HEIRLOOMS

Days = relative days from transplant to maturity

### INDETERMINATE

Shape | Size

Resistance

#### GINFIZ F1

Flattened Globe | 10-14 oz

HR: T<sub>0</sub>MV 0-2, T<sub>0</sub>ANV, Cf(A-E), V 0, F

Extremely productive, striped-German-type with gorgeous color and improved firm texture for better marketability. GinFiz is early to ripen large, ribbed fruit that blush red and orange over yellow like a beautiful sunset. Internal color variation is striking. Impressive yields of high quality fruit.

70 days

#### NEW! BLUE TONIC F1

Flattened Globe | 4-5 oz

HR: T<sub>0</sub>MV 0-2, T<sub>0</sub>ANV, Cf(A-E), V 0, F | IR: N

Blue Tonic delivers a striking indigo blush on uniform, loose-round tomatoes that stand out at harvest. Fruit average about 4-5 oz with good flavor and notable keeping quality, helping you manage harvest windows and reduce losses. Plants are open and productive with reliable fruit set.

70 days

#### GENUWINE F1 (U)

Flattened Globe, Fluted | 8-12 oz

This early maturing indeterminate 'Heirloom Marriage' tomato is a cross between Costoluto Genovese and Brandywine. The beautifully lobed, deep red fruit has the uniqueness and great taste of an heirloom and the many strengths of a hybrid, including cracking tolerance and the ability to store longer.

70 days

#### DAMSEL F1

Oblate Globe | 10-14 oz

Full flavor and character found in heirloom tomatoes with the yield and robust plant structure of a modern hybrid. Damsel is a versatile and adaptable pink beefsteak that can be grown trellised in a tunnel or staked in the field. Can yield into the fall due to late blight resistance.

75 days

LB, N, V

#### NEW! CHEROKEE CARBON F1

Oblate Globe | 10-12 oz

A cross between Cherokee Purple and Carbon with all the flavor and look with faster maturity, much higher yields, and better uniformity. Large, ribbed purple fruit with robust color and flavor.

75 days

#### DARKSTAR F1 (U)

Oblate Globe | 8-10 oz

This beautiful tomato is a stunning rich purple color with brown hues and incredible flavor. Plants are high yielding with the look of an heirloom tomato and an added bonus of late blight resistance.

75 days

HR: LB, V

#### MAITAI F1

Oblate Globe | 6-10 oz

HR: T<sub>0</sub>MV 0-2, T<sub>0</sub>ANV, Cf(A-E), V 0, F 0-2

High quality, golden yellow fruit with a delicate blush of red. MaiTai's plants are well balanced, producing a heavy set of firm, smooth tomatoes that hold up well after harvest.

75 days

#### MARSALATO F1

Flattened Globe, Fluted | 8-9oz

HR: Cf(A-E), F 0, For, T<sub>0</sub>ANV, T<sub>0</sub>MV 0-2, V 0

A beautiful hybrid Marmande-type tomato with rich flavor and extensive disease resistance! Excellent yields of medium-sized, deeply ruffled, crimson red fruit. Best when harvested with slightly green shoulders. Drier, meatier flesh is good for cooking and stuffing.

75 days

#### CUBALIBRE F1

Oblate Globe | 6-10 oz

HR: T<sub>0</sub>MV 0-2, T<sub>0</sub>ANV, Cf(A-E), V 0, F 0-1 | IR: PM

Improved black-heirloom-type with excellent disease package for protected culture. Cubalibre's dark, chocolate-red tomatoes are more refined than similar varieties, with firmer fruit for better marketability.

80 days
