

# SPECIALTY LETTUCE

## GREENHOUSE / HYDROPONIC

High-performing varieties with the excellent yield and disease package necessary for this valuable real estate.

Size | Type

Resistance

**AZIRKA**  (P)PVP

Large | Lolla Rossa HR: DM:16-36EU/1-9US, Nr:0, TBSV | IR: LMV:1  
Triple red lolla rossa for greenhouse production. Azirka's rounded leaves are very thick and crunchy with good three-dimensional structure. Strong disease package.

**CASEY (P)**

Large | Butterhead

HR: DM:16-37EU/1-9US, Nr:0, Pb

Green butterhead for greenhouse and hydroponic production. Casey is medium-fast growing and yields large heads with excellent weight. It has a flat, clean, closed base and a strong disease resistance package. Strong roots and good heat tolerance make it a great choice for long day length summer production.

**CRISTABEL**  (P)

Small-Large | Ice Leaf

HR: Nr: 0, TBSV | IR: LMV:1

High yielding frilled ice leaf type for greenhouse and hydroponic production. Cristabel's dark green leaves are very thick. Heads have an upright habit with a short core. Reliable in various conditions.

**XIOMARA**  (P)

Mini | Romaine

HR: DM:16-36EU/1-9US, Fol:1, Nr:0, TBSV | IR: LMV:1

Dark green mini romaine for greenhouse and hydroponic production. Xiomara has a clean, upright base with slightly blistered leaves. Fast growing with very good bolting tolerance and an excellent disease package.

## LITTLE GEM / MINI ROMAINE

Type

Resistance

### REQUENA (P)

40 days

Little Gem HR: DM16-30, 32, 33EU, F:1, Nr:0 | IR: LMV:1  
Our smallest little gem with glossy, dark green, savoyed leaves surrounding a dense, butter yellow center. Requena's compact heads hold well in the field with strong resistance to tip burn.

### DRAGOON (P)

42 days

Little Gem HR: DM 1-8US/16-27, 29, 32, 34, 36EU, Nr:0, TBSV | IR: LMV:1  
Compact little gem with dark green blistered outer leaves. Dragoon is quick to fill and can be harvested at a range of sizes while maintaining a short core.

### NEWHAM (P)

42 days

Little Gem HR: DM:1-9 US/16-21, 23-26, 28-37EU, Nr:0, Pb | IR: LMV, Rs  
Our best-selling green little gem with an upright habit and nice tight center. Newham's broad, slightly savoyed, outward curving glossy leaves form refined, attractive heads.

### SPRETNAK (P)

42 days

Little Gem HR: DM:1-9US/16-21, 23-26, 28-37EU, Pb, Fol:1,4  
Upright romaine structure with broad outward curling smooth leaves surrounding a closed head. Spretnak has a densely packed heart with buttery blanched leaves and heavy weight.

### NEW! ROSAINE (P)

45 days

Little Gem HR: DM:16-26, 31, 32EU, Fol:1, Nr:0, Pb  
Dark red little gem to complement our other mini varieties. Rosaïne has an open, yet upright habit with glossy, slightly savoyed red leaves surrounding a buttery, bright green center. Pairs well with Cegolaine and Newham for mixed head sales.

### XALBADORA (P)

45 days

Mini Romaine HR: DM:1-9 US/16-36 EU, Nr:0, TBSV | IR: LMV:1  
Widely adapted mini green romaine with well blistered, glossy leaves and nicely blanched heart. Xalbadora's compact heads are slightly larger than our little gems.

## CRUNCHY COS/ ICEBERG ROMAINE

Size

Resistance

### CHICARITA (P)

45 days

Mini HR: DM 17,18,22,24,25,29,30,33-35EU, Fol:1, Nr:0 | IR: LMV:1  
Crunchy mini cos for field and hydroponic production. Chicarita is an appealing cross of romaine and iceberg with the thick, crunchy texture, sweet flavor and excellent shelf life of an iceberg paired with the upright habit and color of a romaine. Cupped leaves are perfect for use as a wrap or to hold a myriad of ingredients for snacking. Very slow to bolt and strong against tipburn.

MINI HEADS ARE PERFECT FOR SELLING AS PAIRS AND TRIOS.

## MINI HEADS

MARKET THESE COMPACT VARIETIES TOGETHER FOR COLORFUL MIXED BOXES AND DISPLAYS.

TRIAL THEM ALL TO CHOOSE YOUR PERFECT COMBINATION.

## Eazy leaf<sup>®</sup>

One-cut lettuce varieties yield a high count of leaves of uniform size and shape making them a great alternative for salad mix production. You can use one-cut lettuces in two different ways.

**-Full heads:** cut low so that the leaves stay attached to the core and market as a mini head, individually or in a mixed case. Customers and chefs will appreciate the easy processing with low waste and high quality. Plant heads 6-8" in row.

**-Loose leaves:** cut a few inches above the ground in field—either by hand or mechanically—to create an improved baby leaf lettuce product. Vary height of cut to desired leaf size. Heads will regrow for multiple cuts if harvested above growing tip. Great texture and durability will give you excellent volume and bag fill. Improved shelf life due to the fact that they are mature leaves and they have small cut surfaces, which also addresses health and safety concerns. Plant multiple varieties in one bed for a diversified salad mix. We suggest a high density planting of 4-6" in row for high yields.

Type *Days = relative days from direct seed to maturity*  
Resistance

**NEW! EZPARK**  (P) 

Green Tango **48 days**  
HR: DM:16-36EU, Nr:0 | IR:LMV:1  
Fast maturing, bright green tango for year-round production. Ezpark's medium to large heads yield a high volume of strongly serrated, thick textured leaves with crunchy ribs. Excellent uniformity and field holding. Pair with Rhone red tango.

**NEW! RHONE** (P)

Red Tango **50 days**  
HR: DM:16-33EU, NR:0  
Uniquely spiky red tango with medium-fast speed and fantastic holding ability. Rhone's large heads have excellent uniformity and a high leaf count of green leaves with dark red margins. Better heat tolerance than Burgandy. Pair with Ezpark green tango.

**BURGANDY**  (P)

Red Tango **52 days**  
HR: DM 1-9 US/16-36 EU, Nr:0  
Deeply incised leaves with frilly edges that form well-filled heads. Burgandy's leaves are tipped with burgundy which contrasts beautifully with its bright green base.

**EZTRON**  (P)

Green Tango **52 days**  
HR: DM:1-9US/16-36EU, Nr:0, TBSV  
Bright green spiky tango with deeply incised leaves. Eztron's crisp ribs have a fantastic crunch, and frilly tips create a great loft. Heads are quick to size up with fast regrowth.

**BRENTWOOD**  (P) 

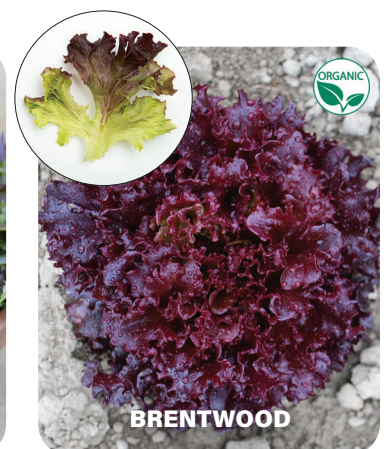

Red Leaf **55 days**  
HR: DM 1-9 US/16-36EU, Nr:0 | IR: Fol:1  
Dense heads of deep red highlight a little peek of green in the center. Brentwood's cut leaves are light green with glossy burgundy margins that are cupped, slightly blistered and well ruffled for added loft in mixes. Good bolt tolerance.

**NEW! EZFLOR**  (P)

Red Tango **55 days**  
HR: DM:16-37EU, Nr:0, TBSV | IR: Fol:1  
Dark burgundy Eazy Leaf<sup>®</sup> with excellent leaf uniformity. A tango-oak leaf cross, Ezflor's leaves have a thick texture with frilled edges. Heads have medium fast speed with very good field holding maintaining a short core.

**HAMPTON**  (P) 

Green Oak Leaf **55 days**  
HR: DM:1-8US/16-37EU, Nr:0, TBSV | IR: LMV  
Exceptionally beautiful! This Eazy Leaf<sup>®</sup> variety has vivid dark green, frilly leaves with thick texture. Uniform and extremely bolt tolerant Hampton also has good cold tolerance for covered winter production. Truly a dual purpose lettuce for both whole head and cut leaf production.

**GOURMET SALAD MIX IMPROVED**

**SUPER FRILLY LETTUCE MIX**

## SALAD MIXES

*Mix components are subject to change due to availability*

### GOURMET SALAD MIX IMPROVED (U) Osborne EXCLUSIVE!

Mix of at least 7 varieties of baby leaf lettuce all tested for Lettuce Mosaic Virus. The diverse range of color, leaf shape and texture in our Gourmet Salad Mix combines to form an attractive, high quality product with loft and weight. Contains red and green romaine, red and green oak leaf, green tango, and red leaf lettuces.

### SUPER FRILLY LETTUCE MIX (U) Osborne EXCLUSIVE!

Mix of baby leaf lettuces with a stiff yet frilly structure and good crunch. Super Frilly Mix will fill a bag quickly with its excellent loft. Bright color combination with a diversity of textures and flavors. Developed with the growers' needs in mind as well as customer satisfaction.

**MILD & WILD BRASSICA MIX**

**SPICY SALAD COMPLEMENT**

## SYMBOL KEY & DEFINITIONS

**Organic:** Seeds are grown and produced in organic systems without the use of synthetic elements.

**New Addition:** Varieties that are new to our catalog for this edition.

**Untreated:** Seeds are grown in conventional systems, but have no further synthetic elements on the actual seed.

**Osborne Exclusive:** Varieties that are only available to purchase through us.

**Pelleted:** Seeds coated with a clay outer coating that makes it easier to handle due to the uniform size and shape. Pelleted seeds come in both organic and conventional versions. Pelleted seeds need to be kept moist during germination to ensure best results.

**Extremely Heat Tolerant**

**1M** 1,000 Seeds
