## **SPECIALTY**

Leaf attributes Resistances

### RED TABBY F1 (U)

Green leaf/ Red vein and stem HR: DM 1-9, 11-13 | IR: DM 10

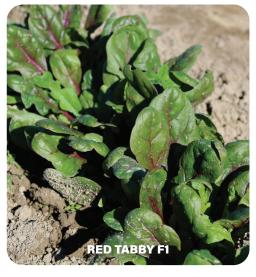

Improved Red Kitten with more intense, dark red stems and darker green leaves that are glossy and thick. Red Tabby can be grown year-round for baby leaf with added protection in cold months. Color is darkest in warm weather.

## RED SNAPPER F1 (U)

Green leaf/ Red vein and stem

HR: DM 1-7, 9, 11-17

Specialty red vein spinach with unique narrow, lobed and serrated leaves. Red Snapper is easy to grow without the pest pressure of arugula which it resembles. Medium speed for all season performance. Recommended for baby leaf production.
