I got this for both my dad and my husband this year and they both absolutely love it! The coffee is such good quality and taste amazing, and it's consciously and ethically sourced. Will DEFINITELY be buying again!!

Super fast shipping with minimal packaging waste. I was really impressed with how this was packaged and shipped. We got it long before the expected delivery date. The coffee smells amazing although it's very very cold here so we haven't had a chance to camp and drink it yet. I would definitely order from this seller again!

This is amazing quality coffee with very eco-friendly packaging that can be reused. It's perfect as a gift or just as a treat for yourself! I 100% recommend this shop :)

Perfect gift for coffee lovers. I always find myself buying gifts that are easy to wrap - this was perfect for that. They're ~pretty~ easy to use - but you do need to be steady - at the end of the day you're pouring boiling hot water while your hand is trying to keep the top of the bag open. Really clever design with how it filters the coffee from the grounds. And really great taste too.

Very fast shipping! Arrived at our home in Massachusetts, USA in about 5 days. Nice packaging too. My husband has been loving trying new coffees from around the world. Excellent quality. It's fun to compare the flavor notes day to day. Highly recommend!
