CONNECTING THE APPLIANCE TO WIFI

DOWNLOAD THE APP TO YOUR PHONE

Download the "TUYA SMART" app, from your chosen app store, using the QR codes below, or by searching for the app in your chosen store.

CONNECTION METHODS AVAILABLE FOR SETUP

The air purifier has two different setup modes, Quick Connection and AP (Access Point). The quick connection is a quick and simple way to set the unit up. The AP connection uses a direct local wifi connection between your phone and the air purifier to upload the network details.

Before starting the setup, with the air purifier plugged in and turned on, press and hold the power button for 5 seconds (until you hear a bleep) to enter the wifi connection mode.

Please ensure your device is in the correct wifi connection mode for the connection type you are attempting, the flashing of the wifi light on your air purifier will indicate this.
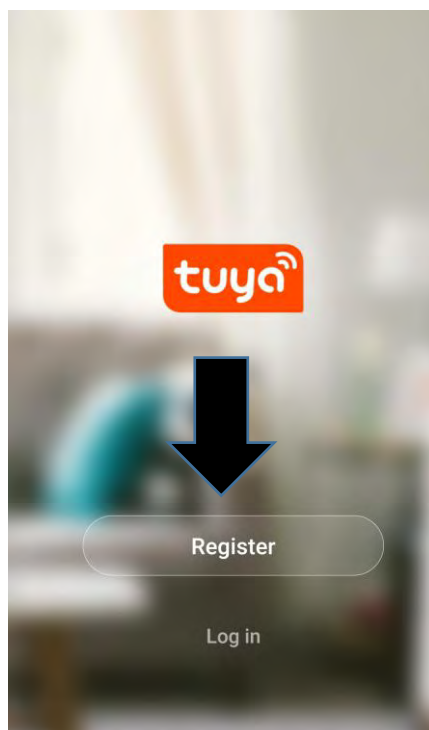

Connection Type	Frequency of Flashes
Quick Connection	Flashes twice per second
AP (Access Point)	Flashes once per three seconds

CHANGING BETWEEN CONNECTION TYPES

To change the unit between the two wifi connection modes, press and hold the Power button for 5 seconds.

# REGISTRE DEG PÅ APP FOR FØRSTE GANG

| 1. Trykk på registrerings-knappen nederst på skjermen.	2. Les reglene for personvern og trykk knappen "AGREE".	3. Skriv inn e-postadressen eller telefonnummeret ditt, og trykk på "Continue"/fortsette for å registrere deg.
4. En verifikasjonskode vil bli tilsendt til metoden som er valgt i trinn 3. Angi så denne koden i appen.	5. Skriv inn passordet du øsnker å opprette. Dette må være mellom 6-20 tegn, og med både bokstaver og tall. Trykk "Done"/ferdig.	6. Appen er nå registrert. Den vil automatisk logge deg på etter registrering.
SETTING UP YOUR HOME WITHIN THE APP

TUYA is designed so it can work with a large number of compatible smart devices within your home. It can also be set up to work with multiple devices within different houses As such during the setup process, the app requires that different areas are created and named to allow easy management of all your devices. When new devices are added, they are assigned to one of the rooms you have created.
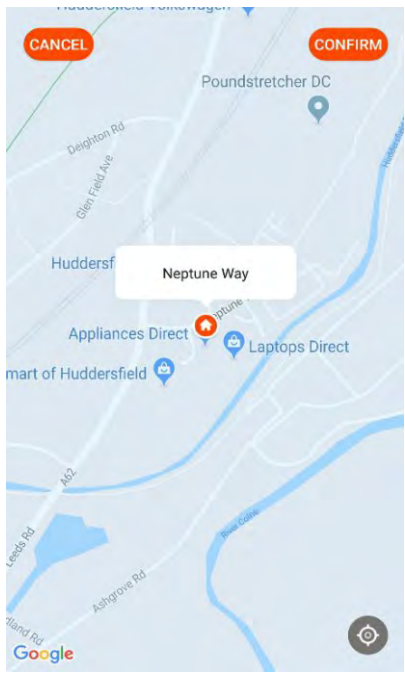

CREATING ROOMS

1. Press on the ADD HOME button.

7. Type in a name for your home,
8. Press on the location button to select the location of your home. (See SETTING YOUR LOCATION below)
9. New rooms can be added by pressing the ADD ANOTHER ROOM option at the bottom. (See ADD ANOTHER ROOM below)
10. Untick any rooms that are not required on the app.
11. Press DONE in the top right corner.

SETTING YOUR LOCATION

Use your finger to move the orange HOME symbol.

When the symbol is in the approximate location of your home, press the confirm button in the top right corner.

ADD ANOTHER ROOM

Type in the name of the room, and press Done in the top right corner

CONNECTING USING QUICK CONNECTION

Before initiating the connection, make sure the unit is in standby mode, with the WIFI light flashing twice per second. If not follow the instructions for changing the connection mode. Also ensure your phone is connected to the wifi network. (We advise turning mobile data off during setup)
|		
1. Open app and press "+" to add device, or use the add device button	2. Select the type of device as "Air Purifier" within the Home Appliance tab.	3. Ensure the wifi light on the air purifier is flashing twice per second, then press on the orange button at the bottom of the screen to confirm.

4. Enter your wifi password and press confirm.	5. This will then transfer the settings to the air purifier. Wait for this to complete. If this fails, retry. If still unsuccessful please review the troubleshooting section for further help.

4

CONNECTING USING AP MODE (ALTERNATIVE METHOD)

Before initiating the connection, make sure the unit is in standby mode, with the wifi light flashing once per second. If not follow the instructions for changing the wifi connection mode. Also ensure your phone is connected to the wifi network. (We advise turning mobile data off during setup)

|		
1. Open app and press "+" to add device, or use the add device button	2. Select the type of device as "Air Purifier" within the Home Appliance tab.	3. Press on the AP mode button in the top right of the screen.
4. Ensure the wifi light on the air purifier is slowly flashing (once per three seconds), then press on the orange button at the bottom of the screen to confirm	5. Enter your wifi password and press confirm.	6. Go to network settings in your phone and connect to the "SmartLife xxx" connection. There is no password to enter. Then return back to the app to complete setup.
This will then transfer the settings to the air purifier.
Once the connection process has completed, go back to the network settings on your phone to ensure your phone has reconnected to your wifi router.

CONTROLLING YOUR APPLIANCE THROUGH THE APP

THE HOME SCREEN

Change Home: If you have a number of units at different houses, you can change between them

Environmental information: Provides outdoor temperature and humidity based on the location details entered

Rooms: Use to view the units set up within each room

Smart Scene: Allows you to program intelligent behaviour based on the internal and external environment
**Add Device:** Add a device to the app, and go through the setup process.

Room Management: Allows rooms to be added, removed or renamed.

Add Device: Add a device to the app, and go through the setup process.

Profile: Provides the option for changing settings, and adding devices using a QR code provided by a friend.

Power   Speed   Function   Timer

Power Button: Use to turn the unit on or off.

SPEED:

Use to change the Fan speed between Low, Medium and High

FUNCTION / SETTINGS:

Use to activate the Ioniser and UV light.

TIMER:

Use to add an off timer while the unit is running, or an on timer while the unit is turned off

NOTES:

Due to continuous development of the app, the layout and available features may be subject to change.
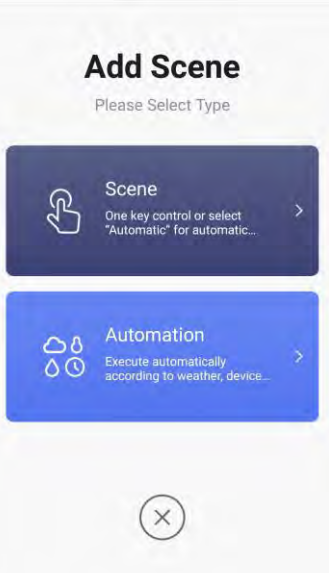

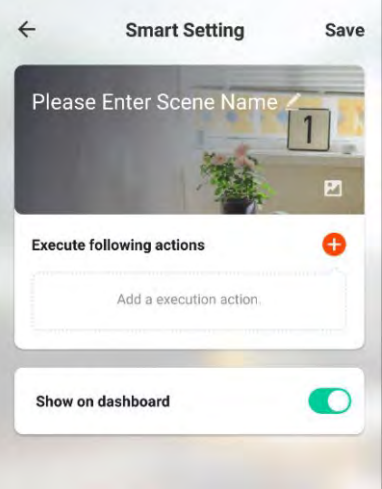

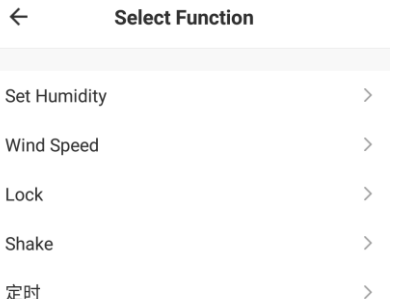

SMART SCENES

Smart Scenes is a powerful tool providing the option to customise the operation of the air purifier based both on conditions within the room and outside influences. This gives the user the option of specifying much more intelligent actions. These are split into two catagories Scene and Automation.
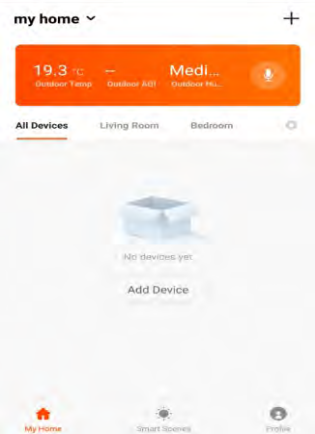

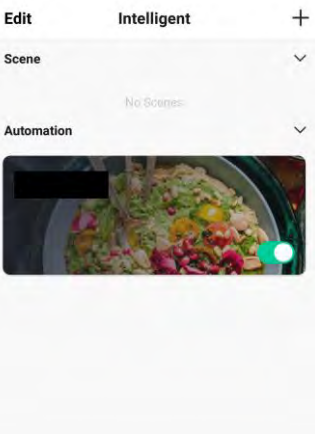

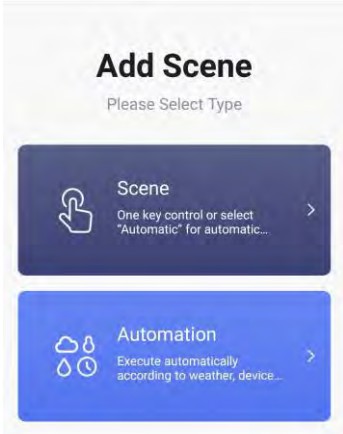

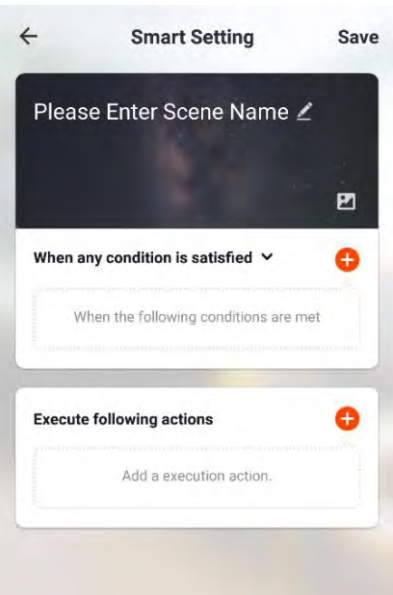

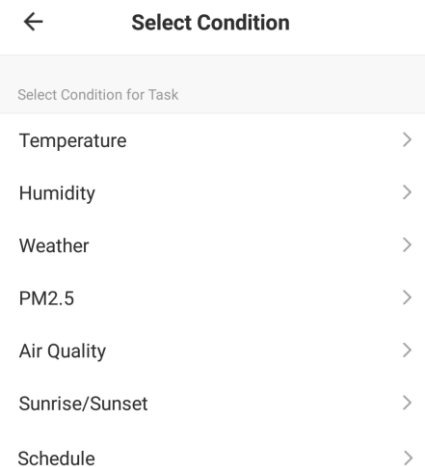

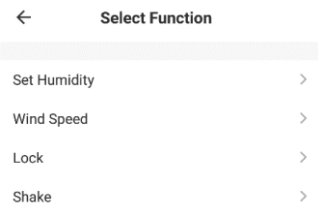

SCENE

Scene allows for a one touch button to be added to the Home screen. The button can be used to change a number of settings in one go, and can change all the settings within the unit. A number of scenes can easily be setup, allowing the user to easily change between a number of preset configurations.

Below is an example of how to set up a scene:

1. Press on the Smart Scene tab at the bottom of the Home screen	2. Press on the Plus in the top right corner to add a smart scene.	3. Select Scene to create a new Scene
	4. Press the Pen next to "Please Enter Scene Name" to input the name for your Scene Show on Dashboard: Leave this on if you require the scene to be displayed as a button on the Home Screen Press the Red Plus to add the action required. Then select the air purifier from the list of devices.	5. Chose the function, set the value for the function, and then press the back button in the top right corner, to return to the previous screen.
6. Once all the functions required have been added, press the Save button in the top right corner to finalise and save your new Scene		

AUTOMATION

Automation allows an automatic action to be set up for the device. This can be triggered by the Time, air quality of the room, weather conditions, and a range of other influences.

1. Press on the Smart Scene tab at the bottom of the Home screen	2. Press on the Plus in the top right corner to add a smart scene.	3. Select Automation to create a new Automation Scene

4. Setup is very similar to the scene setup on the previous page, and includes an extra section for specifying a trigger for the scene to start.

Press the Pen next to "Please Enter Scene Name" to input the name for your Scene

Press the Red Plus next to "When any condition is satisfied" to add the trigger

Press the Red Plus next to "Execute following actions" to add the action required. Then select the air purifier from the list of devices.

5. Select the condition when the automation should start. A number of triggers can be combined.

6. Chose the function, set the value for the function, and then press the back button in the top right corner, to return to the previous screen.

7. Once all the functions required have been added, press the Save button in the top right corner to finalise and save your new scene.

The automation is now set up, it can be turned on and off using the toggle on the image shown on step 2.
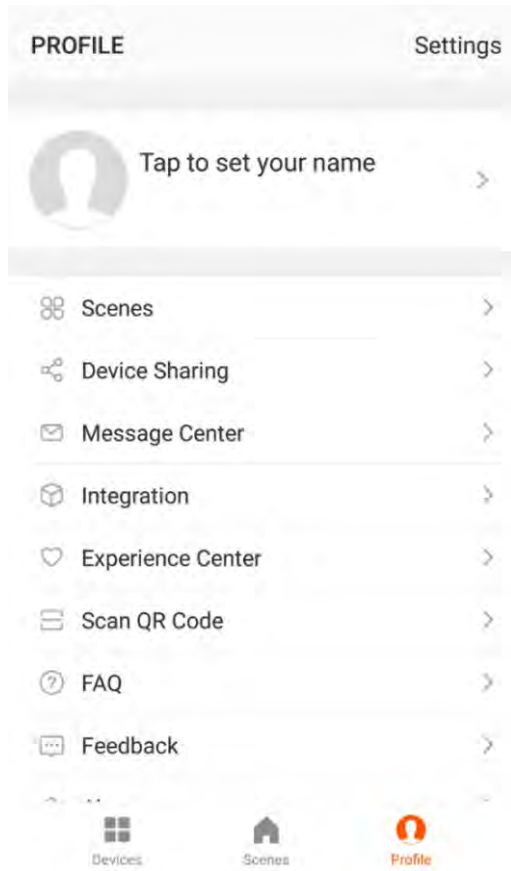

PROFILE TAB

The profile tab gives you the option to edit both your detail, and use the added features of the unit.

CHANGING THE NAME OF YOUR DEVICE

When in any of the device screens further settings for the device can be accessed, by pressing on the three dots in the top right hand corner. The top option within this allows you to change the name of the device to something relevant to the use of the product, such as "Living Room Air Purifier". Within the menu, you also have the option of setting up a pattern lock or change your password.

DEVICE SHARING

This allows you to share access to the controls of your air purifier with friends and family.

INTEGRATION

This allows the unit to be integrated with your favourite home automation hardware such as Google Home and the Amazon Echo.
