

# NovaCaddy Seat Installation Instruction

Model: S2R and X9RD/X9R

Model S2R

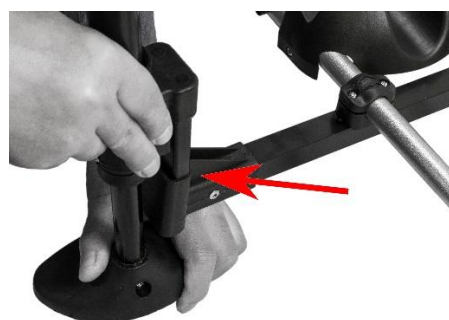

Model X9RD (X9R)

Step 1 for S2R: Slide the seat bracket bar through opening tube at lower frame connector

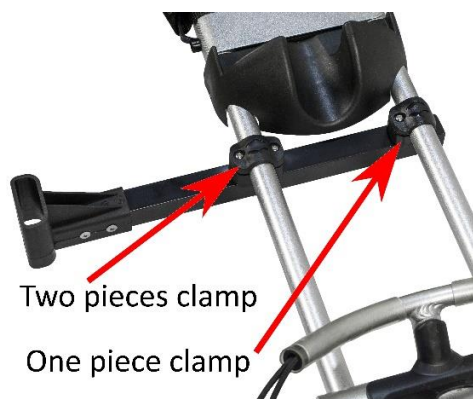

Tighten screws to secure bracket bar in place

Step 2: Fit seat post into slot on the bracket bar. Hold base of post on the ground and lift the post connector to slide on to slot.

Step 1 for X9RD: Seat bracket is attached to the lower frame using the two clamps provided. Two clamps with screws on the right and left. Using heating gun or hair dryer to warm and soft the One Piece Clamp so it will be easy bended and fitted on the frame.

Step 3: Attach seat to top of post. The seat is spring loaded and base is kept off the ground until weight is applied. When sit on the seat, the base will touch the ground for support.
