

MONGOLIAN SHEEPSKIN

HANDLE WITH CARE

Our Mongolian sheepskins have been tanned under strict environmentally friendly guidelines. Rest assure no harmful chemicals or AZO dyes have been applied to this hide.

It is safe for people, pets and gentle on the environment.

We recommend spot cleaning only to soiled areas using a soft, damp wet cloth with fresh water. Do not submerge in water or apply any chemicals to this hide. Allow to air dry in the shade.

Remove loose dirt and debris by gently shaking the hide. We do not recommend vacuuming as the long hair may get caught and become tangled.

Please note that dyed Mongolian sheepskin must not be placed in sunlight. UV rays may fade and discolour the fleece. Colour transfer may occur.
