Windows: FN+ESC is Number Lock
Mac: No Number lock function

Clear function in **Mac**
Backspace in **Windows**

Power indication LED

USB | Bluetooth | Power off

TYPE-C for charging and USB

Charging Your NUMKEY

The NUMKEY includes a braided 'C to C' cable with 'C to A' adaptor for charging.

Power indication

- A blinking Red LED indicates battery is low.
- A steady Red LED stays lit during charging.
- The Red LED turns off once fully charged.

Connectivity

BT pairing and indication

A long press and hold $\left(\text{FN} \right) + \left(\text{TAB} \atop \ast \right) + \left(\text{=} \atop \ast \right)$ will start pairing. A short press of these keys is used to select devices. *A Blue LED indicates BT1. A Green LED indicates BT2.*

- The Blue LED blinks during pairing and turns off once BT1 pairing has finished. A steady Blue LED shows for 30 seconds during BT device switching
- The Green LED blinks during pairing and turns off once BT2 pairing has finished. A steady Green LED shows for 30 seconds during BT device switching.

The Bluetooth name for the NUMKEY will appear on your devices as: *QT NUMKEY*

Key Functions

System switch indication:

$\left(\text{FN} \right) + \left(\text{/} \atop \text{Win} \right)$ *is Windows system.*

$\left(\text{FN} \right) + \left(\text{∗} \atop \text{Mac} \right)$ *is Mac system.*

- A steady Yellow LED for 30 seconds indicates that the Numkey has changed to a Mac system (MAC is the default system Setting).
- A steady Cyan LED for 30 seconds indicates that the NUMKEY has changed to a Windows system.

Number Lock indication/NUMLOCK:

- A steady Purple LED for 30 seconds indicates number lock is turned on.
- The LED turns off if Number Lock is off.

Factory Default Settings

Press $\left(\text{FN} \right) + \left(\text{CLEAR} \right)$ for 3 seconds to reset back to factory default settings.
