

HINGE

The A-Plus operates using a newly designed hinge...

A-Plus Folding Sign

SUPPORT BAR

A hinged support bar on each side of sign snaps into place to keep the sign open.

STRENGTH

A-Plus design provides rigidity, strength, structural integrity and light weight unmatched in any popular polymer based sidewalk sign. Allows for ease of use, easy mobility and many years of good-looking operation.

SIGN PANELS

Sign panels can easily be changed for a variety of styles... Graphics, Write-On, Chalkboards, Changeable Letters or anything you care to put on a 4mm board.

FOLDS FLAT

The sign panel easily folds flat to only 6.5" wide!

WHEELS

Specially designed wheels engage when A-Plus is tilted for easy rolling whether ground is smooth or uneven. They disengage when sign is at rest to prevent unwanted movement.

Manufactured in the USA by **Joseph Struhl Company** 195 Atlantic Avenue, PO Box N, New Hyde Park, NY 11040
