How to Make a Diwali Lantern

1 Print out the last page on a 8.5" x 11" paper for the best results. Print in color to bring the rangoli designs to life.

2 Cut along the solid lines only. You can discard the scrap.

3 Fold along the dotted lines, and turn the lantern inwards such that the rangoli designs are facing the outside.

4 Place glue on the area marked with "glue here" and attach it to the adjacent section to enclose the lantern.

5 Place an LED tealight candle inside the lantern to make the lantern glow!
