

Breeze **PRO**

Peace of mind for your smart home

model number: BWS-1000

The Quick Read

- ✓ Smart Wind, Rain and Sunlight sensor.
- ✓ Simple app-guided setup and threshold settings
- ✓ Control multiple screens, louvers and shutters
- ✓ Requires a Bond Bridge Pro
- ✓ IP 67 rated
- ✓ Solar powered, 2xAA batteries and optional 12VDC

The Whole Story

Breeze Pro is a wind, rain, and sunlight sensor that will trigger your screens, louvers, and shutters based on user-defined thresholds.

Activate devices depending on:

Wind

Rainfall

Sunlight

You will need the Bond Bridge Pro

Breeze Pro must be paired with Bond Bridge Pro in order to work. The set up is extremely simple and guided by the app.

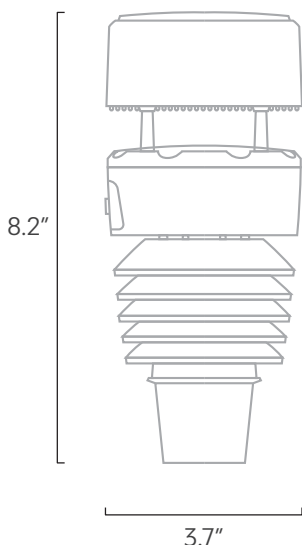

Real time data readings are available in the Bond Home app, so you can tell that the sensor is protecting your screens.

11 ft

Weight
0.92 lbs

Setting weather thresholds

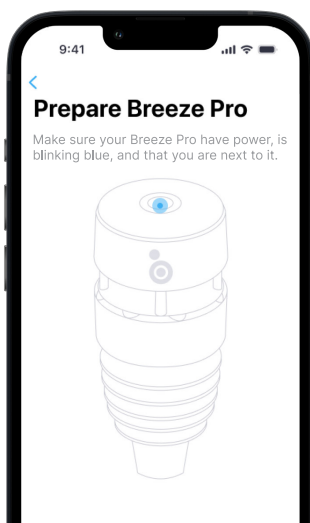

High priority events overwrites or cancel lower priority event:

Example: when wind conditions are met all other triggers for lower priority rain and sunlight are ignored.

Easy app guided setup

No mysterious button press sequences. Just follow the in-app instructions

Be in control

Simple and guided threshold setup with the Bond Home app.
